

Day - 1

- Core Concepts
- Installation
- Upgrading
- Configuration
- Argo Server
- CLI
- Workflow Variables
- Service Accounts
- Workflow RBAC
- Node Field Selectors
- Empty Dir
- Workflow Templates
- Workflow Inputs
- Cluster Workflow Templates
- Cron Workflows
- Cron Backfill
- Templates
- HTTP Template
- Container Set Template

- Template Defaults
- Work Avoidance
- Enhanced Depends Logic
- Data Sourcing and Transformations
- Artifact Repository Ref
- Key-Only Artifacts
- Conditional Artifacts and Parameters
- Resource Duration
- Estimated Duration
- Workflow Pod Security Context
- Workflow Progress
- Workflow Creator
- Synchronization
- Workflow of Workflows
- Step Level Memoization
- Tolerating Pod Deletion
- Widgets
- Retries

Day - 2

- **Workflow Restrictions**
- **Workflow Notifications**
- **Workflow Events**
- **Kubectl**
- **Access Token**
- **Argo Server API**
- **REST API**
- **API Examples**
- **Client Libraries**
- **Events**
- **Webhooks**
- **Submitting A Workflow Via Automation**

- **One Workflow Submitting Another**
- **Resume A Workflow**
- **Asynchronous Job Pattern**
- **Security**
- **Running At Massive Scale**
- **High-Availability (HA)**
- **Disaster Recovery (DR)**
- **Scaling**
- **Cost Optimisation**
- **Windows Container Support**
- **Environment Variables**
