DevOpsSchool

Course curriculum · November 2026

LEVEL 03 OF 04 · INTERMEDIATE

Bizdevops Intermediate Training

Measure flow and business impact, run experiments and automate feedback loops between production and the business.

LIVE ONLINE **Max 8-10 hours**	CORPORATE (DAY-WISE) **3 days · Days 1-3**	SELF-PACED VIDEO **1-year LMS access**
BATCH SIZE **Max 10 learners**	NEXT BATCHES **1st of every month · weekends: first Saturday**	CERTIFICATE **Verifiable certificate of completion**

Foundation	Essential	Intermediate	Advanced
1 day · Included	2 days · Included	3 days · This curriculum	5 days · Next step

INSIDE THIS CURRICULUM

What you will achieve	Outcomes and level focus
Who should attend	Audience and prerequisites
Agenda	32 topics · Foundation to Intermediate
Hands-on labs	3 labs
Formats and fees	Live, 1:1, self-paced, corporate
Trainer and reviews	Rajesh Kumar
Enrolment	Batches, payment, contacts

WHY DEVOPSSCHOOL

- Rated 4.6 on Google
- 1,500+ verifiable certificates issued in the public registry
- Trainer Rajesh Kumar: 20 years in industry
- Small batches: max 10 learners, every session recorded

OUTCOMES

What you will achieve

By the end of the Bizdevops course path, you will be able to:

1

Align business and technology

Connect business goals, product decisions and engineering work through shared value streams and metrics.

2

Measure value and flow

Use OKRs, experiments, flow metrics and business observability to steer delivery.

3

Lead BizDevOps at scale

Design operating models, funding and governance that sustain BizDevOps across the enterprise.

WHAT THE INTERMEDIATE LEVEL ADDS

Experimentation, flow metrics, observability and automation

Hands-on: Business-impact dashboard. Instrument a service with product analytics and SLOs, build a dashboard joining flow metrics with revenue and run an A/B test.

WHO SHOULD ATTEND

- Regular Bizdevops users who want to automate, integrate and manage it at a deeper level.
- Specialists who support Bizdevops for colleagues or customers.
- Leads preparing Bizdevops for wider use across projects.

BEFORE YOU START

- The Essential level, or equivalent hands-on experience.
- You can already: Run value stream mapping, hypothesis-driven product work and shared backlogs so business and IT plan and ship together.
- Basic computer skills and a laptop with a stable internet connection for the live sessions and labs.
- This curriculum includes every earlier level, so it is complete on its own.

AGENDA · FOUNDATION TO INTERMEDIATE

Bizdevops Intermediate Training agenda

32 topics. Each level builds on the one before it, so this curriculum lists every earlier level in full. Days are for corporate (day-wise) delivery; live online batches cover the same agenda in max 8-10 hours.

DAY 1 — Foundation: BizDevOps concepts, value and collaboration

Included from Foundation

1. What BizDevOps is: extending DevOps so business stakeholders share goals, data and feedback loops
2. DevOps recap: CALMS, the three ways and continuous delivery principles
3. The BizDevOps loop: business planning, development, operations and feedback on outcomes
4. Outcomes versus outputs: defining business value, customer outcomes and success measures
5. Roles and responsibilities: product owners, business analysts, engineers, SREs and executives
6. Lean and Agile foundations: flow, small batches, iterative delivery and fast feedback
7. Value streams: identifying operational and development value streams
8. Key metrics: DORA metrics alongside business KPIs such as conversion, revenue and churn
9. Culture and collaboration: shared goals, transparency and blameless learning
10. Case study: a digital product team moving from project handoffs to BizDevOps

DAY 2 — Essential: Value stream mapping, product practices and shared tooling

Included from Essential

11. Value stream mapping workshops: current state, lead time, process time and percent complete and accurate
12. Product vision and OKRs: linking objectives and key results to team backlogs
13. Hypothesis-driven development: framing features as experiments with measurable outcomes
14. Requirements collaboration: user story mapping and behaviour-driven development with Gherkin
15. Shared tooling: Jira, Azure Boards and Confluence for joint planning and documentation
16. CI/CD for business visibility: pipelines, release status and deployment dashboards
17. Feature flags: progressive rollout, business-controlled releases and kill switches
18. Business-facing dashboards: combining delivery metrics with product and revenue data
19. Low-code participation: business users building workflows with low-code platforms and governance
20. Release planning and stakeholder communication: release notes, demos and feedback sessions
21. Team working agreements: decision rights, service level expectations and escalation paths

DAY 3 — Intermediate: Experimentation, flow metrics, observability and automation

New at this level

22. Experimentation: A/B tests, statistical power, test duration, significance and guardrail metrics
23. Product analytics: event tracking, funnels and cohorts with tools such as GA4, Mixpanel or Amplitude
24. Flow Framework metrics: flow velocity, time, load, efficiency and distribution
25. Value stream management platforms: GitLab value stream analytics, Azure DevOps Analytics and Jira Align
26. Business observability: linking traces and SLOs to business transactions and revenue impact
27. Incident management with business impact: severity by customer impact and business communication
28. FinOps and unit economics: cost per transaction, cost per customer and showback
29. Compliance as code: policy checks, audit evidence and approvals inside pipelines
30. DevSecOps for business risk: threat modelling and risk-based prioritisation

31. Automated feedback loops: production signals feeding backlog priorities and roadmaps
32. Troubleshooting collaboration: diagnosing slow flow, bottlenecks and misaligned priorities

PRACTICE

Hands-on labs

You build these yourself during the course, guided by the trainer.

FOUNDATION

Map a business value stream

Map one product's value stream from customer request to production, mark handoffs and delays and define two outcome metrics.

ESSENTIAL

Hypothesis-driven feature release

Turn a business goal into an OKR and hypothesis, write BDD scenarios, release behind a feature flag and report results.

INTERMEDIATE

Business-impact dashboard

Instrument a service with product analytics and SLOs, build a dashboard joining flow metrics with revenue and run an A/B test.

HOW YOU CAN LEARN

Formats and fees

The same agenda in four formats. Fees are in Indian rupees as of November 2026; the course page shows them in your currency.

FORMAT	DURATION	WHAT YOU GET	FEE
Live & interactive (online)	Max 8-10 hours	Instructor-led public batch of max 10 learners with demos, labs, Q&A and assignment review. Weekday batches start on the 1st of every month, weekend batches on the first Saturday of every month.	**INR 34,999**
1:1 live training (online)	Max 8-10 hours, one-to-one	The same agenda, taught one-to-one by the trainer. Starts immediately, without waiting for the next batch; sessions planned around your working hours, at your pace.	**INR 99,999**
Self-paced video	1-year LMS access	All four Bizdevops levels, plus 20+ more courses and 50+ tools, at your own pace.	**INR 833/month** billed yearly at INR 9,996
Corporate (day-wise)	3 days for this level	A private batch for your team, on demand. Foundation 1 day, Essential 2, Intermediate 3, Advanced 5 (cumulative).	**Quote on request**

ASSESSMENT AND CERTIFICATE

Your progress is checked through hands-on labs and assignments at every level. On completion you receive a DevOpsSchool certificate of completion with a unique credential ID that anyone can verify at devopsschool.com/certificates.

INCLUDED WITH EVERY LIVE BATCH

- Every live session is recorded and stays in your LMS for a year.
- Can't attend your batch? Move to next month's batch.
- Free demo class before you pay.
- Free 10-15 minute call with an advisor or the trainer to check the course fits you.

YOUR TRAINER

Learn from Rajesh Kumar

Principal Architect, trainer and mentor in DevOps, SRE, DevSecOps and platform engineering, with 20 years across 8+ software MNCs, including Staff DevOps/SRE Engineer for a leading Japanese mobile-payment platform and Principal DevOps Architect and Manager in Europe.
