

Day - 1

- **Introduction to Bosun**
 - History, Features, Use Cases
- **Bosun Architecture**
 - Bosun + OpenTSDB + SCollector Overview
- **Installation of Bosun and OpenTSDB (Standalone + Docker Options)**
- **Introduction to SCollector**
 - Setup, Configuration, Custom Metrics
 - Working with Time-Series Data in Bosun
- **Hands-On Lab**
 - Setup Bosun + SCollector + Sample Metrics Dashboard

Day - 2

- **Writing Alert Rules**
 - Syntax, Functions, Expressions
- **Macros and Templates**
 - Reusable Rule Logic & Custom Notifications
- **Real-World Alerting Examples**
 - Disk, CPU, Memory, HTTP Latency
- **Notification Integration (Slack, Email, PagerDuty, Webhooks)**
 - Debugging Alerts, Alert History, and Dependency Chains
- **Hands-On Lab**
 - Build Full Alerting Pipeline with Custom Templates
- **Wrap-up**
 - Q&A, Best Practices
