DevOpsSchool

Course curriculum · November 2026

LEVEL 02 OF 04 · ESSENTIAL

Bosun Essential Training

Write maintainable Bosun rule files with notifications, lookups and macros, test them against history and run the alert workflow.

LIVE ONLINE **Max 8-10 hours**	CORPORATE (DAY-WISE) **2 days · Days 1-2**	SELF-PACED VIDEO **1-year LMS access**
BATCH SIZE **Max 10 learners**	NEXT BATCHES **1st of every month · weekends: first Saturday**	CERTIFICATE **Verifiable certificate of completion**

Foundation	Essential	Intermediate	Advanced
1 day · Included	2 days · This curriculum	3 days · Next step	5 days · Later

INSIDE THIS CURRICULUM

What you will achieve	Outcomes and level focus
Who should attend	Audience and prerequisites
Agenda	22 topics · Foundation to Essential
Hands-on labs	2 labs
Formats and fees	Live, 1:1, self-paced, corporate
Trainer and reviews	Rajesh Kumar
Enrolment	Batches, payment, contacts

WHY DEVOPSSCHOOL

- Rated 4.6 on Google
- 1,500+ verifiable certificates issued in the public registry
- Trainer Rajesh Kumar: 20 years in industry
- Small batches: max 10 learners, every session recorded

OUTCOMES

What you will achieve

By the end of the Bosun course path, you will be able to:

1

Write expression-based alerts

Build Bosun alerts that combine queries, baselines and lookups to catch real problems with few false alarms.

2

Operate the alert workflow

Run acknowledgements, silences, escalations and API automation so on-call teams act on the right alerts.

3

Scale and govern monitoring

Size the time-series backend, harden Bosun and plan a governed path to newer alerting platforms.

WHAT THE ESSENTIAL LEVEL ADDS

Rule files, notifications and alert workflow

Hands-on: Create a team rule file with notifications. Write a rule file with lookups, a macro and email plus webhook notifications, test it against last week's data and silence a host during maintenance.

WHO SHOULD ATTEND

- Learners who know the basics of Bosun and want to use it confidently every day.
- Professionals taking over Bosun work on a live project.
- Teams agreeing on a common way of working with Bosun.

BEFORE YOU START

- The Foundation level, or equivalent hands-on experience.
- You can already: Install Bosun and scollector, explore the web UI and write your first expression-based alert on host metrics.
- Basic computer skills and a laptop with a stable internet connection for the live sessions and labs.
- This curriculum includes every earlier level, so it is complete on its own.

AGENDA · FOUNDATION TO ESSENTIAL

Bosun Essential Training agenda

22 topics. Each level builds on the one before it, so this curriculum lists every earlier level in full. Days are for corporate (day-wise) delivery; live online batches cover the same agenda in max 8-10 hours.

DAY 1 — Foundation: Architecture, installation and first alert

Included from Foundation

1. Monitoring concepts: metrics, time series, tags, thresholds and why Bosun uses expression-based alerting
2. Bosun architecture: Bosun server, scollector agents, tsdbrelay, OpenTSDB on HBase and the Redis state store
3. Supported backends: OpenTSDB, Graphite, InfluxDB and Elasticsearch query functions in one expression language
4. Installing Bosun: release binary or container image, bosun.toml system settings and the rule file location
5. Installing scollector: Linux and Windows agents, sending to Bosun or OpenTSDB, verifying metrics arrive
6. Web UI tour: Items, Graph, Expression, Rule Editor and Dashboard pages
7. Metric naming and tags: os.cpu, os.mem.used, host tag and designing tag keys with low cardinality
8. First expression: q() query syntax with aggregator, metric, tags, relative start and end times
9. Reduction functions: avg, last, min, max, sum and percentile to turn series into numbers
10. First alert: warn and crit expressions, $variables and viewing alert state on the dashboard

DAY 2 — Essential: Rule files, notifications and alert workflow

New at this level

11. Rule file structure: alert, notification, lookup, macro and message body sections
12. Expression language: arithmetic, comparisons and the difference between series, number and scalar results
13. Baseline functions: change, diff, band, over and window for week-over-week and historical comparisons
14. Alert keywords: warnNotification, critNotification, runEvery, ignoreUnknown and unjoinedOK
15. Notifications: SMTP email settings, HTTP post webhooks and chat integrations through post bodies
16. Alert messages: subject and body written in Go text and HTML rendering syntax using .Eval, .Graph and .Last
17. Lookups and macros: per-host or per-service thresholds and reusable alert snippets
18. Testing rules: Rule Editor test runs against past time ranges and the alert timeline view
19. Incident workflow: acknowledge, close and forget alerts from the dashboard with history
20. Silences: maintenance windows by tag set, duration and the forget option
21. scollector configuration: scollector.toml, enabling collectors, custom tags, process and service monitoring
22. Graph page: building graphs from expressions and embedding graphs in notifications

PRACTICE

Hands-on labs

You build these yourself during the course, guided by the trainer.

FOUNDATION

Build a host CPU and memory alert

Install Bosun and scollector on a lab VM, graph CPU and memory metrics, then write an alert with warn and crit thresholds and watch it fire.

ESSENTIAL

Create a team rule file with notifications

Write a rule file with lookups, a macro and email plus webhook notifications, test it against last week's data and silence a host during maintenance.

HOW YOU CAN LEARN

Formats and fees

The same agenda in four formats. Fees are in Indian rupees as of November 2026; the course page shows them in your currency.

FORMAT	DURATION	WHAT YOU GET	FEE
Live & interactive (online)	Max 8-10 hours	Instructor-led public batch of max 10 learners with demos, labs, Q&A and assignment review. Weekday batches start on the 1st of every month, weekend batches on the first Saturday of every month.	**INR 34,999**
1:1 live training (online)	Max 8-10 hours, one-to-one	The same agenda, taught one-to-one by the trainer. Starts immediately, without waiting for the next batch; sessions planned around your working hours, at your pace.	**INR 99,999**
Self-paced video	1-year LMS access	All four Bosun levels, plus 20+ more courses and 50+ tools, at your own pace.	**INR 833/month** billed yearly at INR 9,996
Corporate (day-wise)	2 days for this level	A private batch for your team, on demand. Foundation 1 day, Essential 2, Intermediate 3, Advanced 5 (cumulative).	**Quote on request**

ASSESSMENT AND CERTIFICATE

Your progress is checked through hands-on labs and assignments at every level. On completion you receive a DevOpsSchool certificate of completion with a unique credential ID that anyone can verify at devopsschool.com/certificates.

INCLUDED WITH EVERY LIVE BATCH

- Every live session is recorded and stays in your LMS for a year.
- Can't attend your batch? Move to next month's batch.
- Free demo class before you pay.
- Free 10-15 minute call with an advisor or the trainer to check the course fits you.

YOUR TRAINER

Learn from Rajesh Kumar

Principal Architect, trainer and mentor in DevOps, SRE, DevSecOps and platform engineering, with 20 years across 8+ software MNCs, including Staff DevOps/SRE Engineer for a leading Japanese mobile-payment platform and Principal DevOps Architect and Manager in Europe.

Profile: www.rajeshkumar.xyz · Videos: youtube.com/@TheDevOpsSchool

20 years in industry	**200+** corporate trainings
10,000+ engineers mentored	**70+** organisations coached

REVIEWS

What learners say

Rated 4.6 on Google · more reviews at devopsschool.com/testimonials and in our video testimonials.

> “Rajesh is very good trainer. Rajesh was able to resolve our queries and question effectively. We really liked the hands-on examples covered during this training program.”
>
> Indrayani, India

> “The training was very useful and interactive. Rajesh helped develop the confidence of all.”
>
> Abhinav Gupta, Pune

START YOUR BOSUN TRAINING

Join the next batch

Weekday batches start on the 1st of every month and weekend batches on the first Saturday of every month, with max 10 learners each. 1:1 training can start immediately; corporate batches run on demand. We reply within 1 hour.
