DevOpsSchool

Course curriculum · November 2026

LEVEL 01 OF 04 · FOUNDATION

Chaos Engineering Foundation Training

Explain chaos engineering principles, design a safe experiment with a steady-state hypothesis and run your first pod-kill test.

LIVE ONLINE **Max 8-10 hours**	CORPORATE (DAY-WISE) **1 day · Day 1**	SELF-PACED VIDEO **1-year LMS access**
BATCH SIZE **Max 10 learners**	NEXT BATCHES **1st of every month · weekends: first Saturday**	CERTIFICATE **Verifiable certificate of completion**

Foundation	Essential	Intermediate	Advanced
1 day · This curriculum	2 days · Next step	3 days · Later	5 days · Later

INSIDE THIS CURRICULUM

What you will achieve	Outcomes and level focus
Who should attend	Audience and prerequisites
Agenda	10 topics · Foundation
Hands-on labs	1 lab
Formats and fees	Live, 1:1, self-paced, corporate
Trainer and reviews	Rajesh Kumar
Enrolment	Batches, payment, contacts

WHY DEVOPSSCHOOL

- Rated 4.6 on Google
- 1,500+ verifiable certificates issued in the public registry
- Trainer Rajesh Kumar: 20 years in industry
- Small batches: max 10 learners, every session recorded

OUTCOMES

What you will achieve

By the end of the Chaos Engineering course path, you will be able to:

1

Design safe experiments

Write hypothesis-driven chaos experiments with clear blast radius, abort conditions and success measures.

2

Use leading chaos tools

Inject Kubernetes, network, application and cloud faults with Chaos Mesh, LitmusChaos, Chaos Toolkit, FIS and Chaos Studio.

3

Run a resilience program

Turn experiments, game days and DR tests into a governed program that measurably improves reliability.

WHAT THE FOUNDATION LEVEL ADDS

Principles, experiment design and first fault

Hands-on: Run a first steady-state experiment. Define a steady-state metric for a demo shop on Kubernetes, kill one service pod and record whether the hypothesis held.

WHO SHOULD ATTEND

- Beginners and working professionals who are new to Chaos Engineering and want a solid, hands-on start.
- Engineers, analysts, testers and students preparing to use Chaos Engineering on real work.
- Leads and managers who want first-hand familiarity with Chaos Engineering.

BEFORE YOU START

- No prior Chaos Engineering experience is needed.
- Basic computer skills and a laptop with a stable internet connection for the live sessions and labs.
- This curriculum includes every earlier level, so it is complete on its own.

AGENDA · FOUNDATION

Chaos Engineering Foundation Training agenda

10 topics. Each level builds on the one before it, so this curriculum lists every earlier level in full. Days are for corporate (day-wise) delivery; live online batches cover the same agenda in max 8-10 hours.

DAY 1 — Foundation: Principles, experiment design and first fault

New at this level

1. Chaos engineering principles: steady-state hypothesis, real-world events, production focus and minimal blast radius
2. Background: Netflix Chaos Monkey, the Simian Army and the published Principles of Chaos Engineering
3. Reliability basics: SLIs, SLOs, error budgets and common failure modes in distributed systems
4. Experiment anatomy: hypothesis, method, abort conditions, rollback plan and observations
5. Failure types: instance loss, network latency and loss, dependency outage, resource exhaustion, zone failure
6. Tool landscape: Chaos Toolkit, LitmusChaos, Chaos Mesh, Gremlin, AWS FIS and Azure Chaos Studio
7. Observability prerequisites: metrics, logs, traces and dashboards in place before injecting faults
8. Lab environment: Kubernetes cluster, a microservices demo app, Prometheus and Grafana
9. First experiment: delete a pod and verify the steady state recovers within the SLO
10. Safety and communication: approvals, stakeholder notice and a clear stop button

PRACTICE

Hands-on labs

You build these yourself during the course, guided by the trainer.

FOUNDATION

Run a first steady-state experiment

Define a steady-state metric for a demo shop on Kubernetes, kill one service pod and record whether the hypothesis held.

HOW YOU CAN LEARN

Formats and fees

The same agenda in four formats. Fees are in Indian rupees as of November 2026; the course page shows them in your currency.

FORMAT	DURATION	WHAT YOU GET	FEE
Live & interactive (online)	Max 8-10 hours	Instructor-led public batch of max 10 learners with demos, labs, Q&A and assignment review. Weekday batches start on the 1st of every month, weekend batches on the first Saturday of every month.	**INR 34,999**
1:1 live training (online)	Max 8-10 hours, one-to-one	The same agenda, taught one-to-one by the trainer. Starts immediately, without waiting for the next batch; sessions planned around your working hours, at your pace.	**INR 99,999**
Self-paced video	1-year LMS access	All four Chaos Engineering levels, plus 20+ more courses and 50+ tools, at your own pace.	**INR 833/month** billed yearly at INR 9,996
Corporate (day-wise)	1 day for this level	A private batch for your team, on demand. Foundation 1 day, Essential 2, Intermediate 3, Advanced 5 (cumulative).	**Quote on request**

ASSESSMENT AND CERTIFICATE

Your progress is checked through hands-on labs and assignments at every level. On completion you receive a DevOpsSchool certificate of completion with a unique credential ID that anyone can verify at devopsschool.com/certificates.

INCLUDED WITH EVERY LIVE BATCH

- Every live session is recorded and stays in your LMS for a year.
- Can't attend your batch? Move to next month's batch.
- Free demo class before you pay.
- Free 10-15 minute call with an advisor or the trainer to check the course fits you.

YOUR TRAINER

Learn from Rajesh Kumar

Principal Architect, trainer and mentor in DevOps, SRE, DevSecOps and platform engineering, with 20 years across 8+ software MNCs, including Staff DevOps/SRE Engineer for a leading Japanese mobile-payment platform and Principal DevOps Architect and Manager in Europe.

Profile: www.rajeshkumar.xyz · Videos: youtube.com/@TheDevOpsSchool

20 years in industry	**200+** corporate trainings
10,000+ engineers mentored	**70+** organisations coached

REVIEWS

What learners say

Rated 4.6 on Google · more reviews at devopsschool.com/testimonials and in our video testimonials.

> “Rajesh is very good trainer. Rajesh was able to resolve our queries and question effectively. We really liked the hands-on examples covered during this training program.”
>
> Indrayani, India

> “The training was very useful and interactive. Rajesh helped develop the confidence of all.”
>
> Abhinav Gupta, Pune

START YOUR CHAOS ENGINEERING TRAINING

Join the next batch

Weekday batches start on the 1st of every month and weekend batches on the first Saturday of every month, with max 10 learners each. 1:1 training can start immediately; corporate batches run on demand. We reply within 1 hour.
