DevOpsSchool

Course curriculum · November 2026

LEVEL 02 OF 04 · ESSENTIAL

CloudBees Essential Training

Standardize pipelines with shared libraries and catalogs, control access with RBAC and folders and manage controllers as code.

LIVE ONLINE **Max 8-10 hours**	CORPORATE (DAY-WISE) **2 days · Days 1-2**	SELF-PACED VIDEO **1-year LMS access**
BATCH SIZE **Max 10 learners**	NEXT BATCHES **1st of every month · weekends: first Saturday**	CERTIFICATE **Verifiable certificate of completion**

Foundation	Essential	Intermediate	Advanced
1 day · Included	2 days · This curriculum	3 days · Next step	5 days · Later

INSIDE THIS CURRICULUM

What you will achieve	Outcomes and level focus
Who should attend	Audience and prerequisites
Agenda	20 topics · Foundation to Essential
Hands-on labs	2 labs
Formats and fees	Live, 1:1, self-paced, corporate
Trainer and reviews	Rajesh Kumar
Enrolment	Batches, payment, contacts

WHY DEVOPSSCHOOL

- Rated 4.6 on Google
- 1,500+ verifiable certificates issued in the public registry
- Trainer Rajesh Kumar: 20 years in industry
- Small batches: max 10 learners, every session recorded

OUTCOMES

What you will achieve

By the end of the CloudBees course path, you will be able to:

1

Run CloudBees CI

Install and operate CloudBees CI with operations center, managed controllers and Kubernetes agents.

2

Standardize delivery

Use shared libraries, pipeline catalogs, RBAC, CasC, CD/RO and feature flags across teams.

3

Scale and govern CI/CD

Run highly available, secure and compliant CloudBees platforms and migrate from Jenkins.

WHAT THE ESSENTIAL LEVEL ADDS

Pipelines, RBAC, CasC and team setup

Hands-on: Standardize team pipelines. Publish a shared library and a pipeline catalog, onboard two teams into RBAC-protected folders and manage their controller with CasC.

WHO SHOULD ATTEND

- Learners who know the basics of CloudBees and want to use it confidently every day.
- Professionals taking over CloudBees work on a live project.
- Teams agreeing on a common way of working with CloudBees.

BEFORE YOU START

- The Foundation level, or equivalent hands-on experience.
- You can already: Explain the CloudBees portfolio, install CloudBees CI on Kubernetes and run a first pipeline on a managed controller.
- Basic computer skills and a laptop with a stable internet connection for the live sessions and labs.
- This curriculum includes every earlier level, so it is complete on its own.

AGENDA · FOUNDATION TO ESSENTIAL

CloudBees Essential Training agenda

20 topics. Each level builds on the one before it, so this curriculum lists every earlier level in full. Days are for corporate (day-wise) delivery; live online batches cover the same agenda in max 8-10 hours.

DAY 1 — Foundation: CloudBees CI architecture and first pipeline

Included from Foundation

1. CloudBees portfolio: CloudBees CI, CloudBees CD/RO, Feature Management and the CloudBees platform
2. CloudBees CI versus Jenkins: operations center, managed controllers and the CloudBees Assurance Program
3. Architecture: operations center, controllers and agents on traditional and modern (Kubernetes) platforms
4. Installation: CloudBees CI on Kubernetes with the Helm chart
5. Operations center tour: creating managed controllers and connecting client controllers
6. Agents: Kubernetes pod agents, static agents and shared cloud configurations
7. First pipeline: a Jenkinsfile in a multibranch pipeline from Git
8. Plugin baseline: CloudBees Assurance Program verified plugins and the Beekeeper upgrade assistant
9. Credentials and folders: storing secrets and organizing jobs
10. Users and authentication: security realms and SSO with SAML or OIDC

DAY 2 — Essential: Pipelines, RBAC, CasC and team setup

New at this level

11. Pipeline syntax: declarative stages, post, when, parallel and input
12. Shared libraries: vars and src structure, versioning and loading
13. Pipeline catalogs: reusable, parameterized pipeline definitions for standard builds
14. Role-based access control: roles, groups and folder-level permissions
15. Folders Plus: restricting agents, credentials and job types per team
16. Configuration as Code bundles: managing controller configuration from Git
17. Cross-team collaboration: event-based triggers between controllers
18. Plugin management: plugin catalogs, CAP updates and upgrade workflow
19. Build outputs: artifacts, test reports and notifications
20. Troubleshooting builds: Pipeline Explorer and build logs

PRACTICE

Hands-on labs

You build these yourself during the course, guided by the trainer.

FOUNDATION

Run a pipeline on a managed controller

Install CloudBees CI on a Kubernetes cluster, create a managed controller and run a multibranch pipeline on Kubernetes pod agents.

ESSENTIAL

Standardize team pipelines

Publish a shared library and a pipeline catalog, onboard two teams into RBAC-protected folders and manage their controller with CasC.

HOW YOU CAN LEARN

Formats and fees

The same agenda in four formats. Fees are in Indian rupees as of November 2026; the course page shows them in your currency.

FORMAT	DURATION	WHAT YOU GET	FEE
Live & interactive (online)	Max 8-10 hours	Instructor-led public batch of max 10 learners with demos, labs, Q&A and assignment review. Weekday batches start on the 1st of every month, weekend batches on the first Saturday of every month.	**INR 34,999**
1:1 live training (online)	Max 8-10 hours, one-to-one	The same agenda, taught one-to-one by the trainer. Starts immediately, without waiting for the next batch; sessions planned around your working hours, at your pace.	**INR 99,999**
Self-paced video	1-year LMS access	All four CloudBees levels, plus 20+ more courses and 50+ tools, at your own pace.	**INR 833/month** billed yearly at INR 9,996
Corporate (day-wise)	2 days for this level	A private batch for your team, on demand. Foundation 1 day, Essential 2, Intermediate 3, Advanced 5 (cumulative).	**Quote on request**

ASSESSMENT AND CERTIFICATE

Your progress is checked through hands-on labs and assignments at every level. On completion you receive a DevOpsSchool certificate of completion with a unique credential ID that anyone can verify at devopsschool.com/certificates.

INCLUDED WITH EVERY LIVE BATCH

- Every live session is recorded and stays in your LMS for a year.
- Can't attend your batch? Move to next month's batch.
- Free demo class before you pay.
- Free 10-15 minute call with an advisor or the trainer to check the course fits you.

YOUR TRAINER

Learn from Rajesh Kumar

Principal Architect, trainer and mentor in DevOps, SRE, DevSecOps and platform engineering, with 20 years across 8+ software MNCs, including Staff DevOps/SRE Engineer for a leading Japanese mobile-payment platform and Principal DevOps Architect and Manager in Europe.

Profile: www.rajeshkumar.xyz · Videos: youtube.com/@TheDevOpsSchool

20 years in industry	**200+** corporate trainings
10,000+ engineers mentored	**70+** organisations coached

REVIEWS

What learners say

Rated 4.6 on Google · more reviews at devopsschool.com/testimonials and in our video testimonials.

> “Rajesh is very good trainer. Rajesh was able to resolve our queries and question effectively. We really liked the hands-on examples covered during this training program.”
>
> Indrayani, India

> “The training was very useful and interactive. Rajesh helped develop the confidence of all.”
>
> Abhinav Gupta, Pune

START YOUR CLOUDBEES TRAINING

Join the next batch

Weekday batches start on the 1st of every month and weekend batches on the first Saturday of every month, with max 10 learners each. 1:1 training can start immediately; corporate batches run on demand. We reply within 1 hour.
