OUTCOMES

What you will achieve

By the end of the Codenvy course path, you will be able to:

1

Work in cloud workspaces

Build, run and preview projects for common stacks in browser-based workspaces.

2

Run a team workflow

Use factories, VCS, issue and CI integration and guided tours to onboard contributors quickly.

3

Administer and modernize

Install, secure, scale and back up Codenvy and migrate to Eclipse Che or OpenShift Dev Spaces.

WHAT THE FOUNDATION LEVEL ADDS

Cloud workspaces, stacks and projects

Hands-on: Build and run a project in the browser. Create a Java Spring workspace, import a Git project, define build and run commands and open the running app through a preview URL.

- Engineers, analysts, testers and students preparing to use Codenvy on real work.
- Leads and managers who want first-hand familiarity with Codenvy.

BEFORE YOU START

- No prior Codenvy experience is needed.
- Basic computer skills and a laptop with a stable internet connection for the live sessions and labs.
