DevOpsSchool

Course curriculum · November 2026

LEVEL 01 OF 04 · FOUNDATION

Cyber Security Foundation Training

Explain core cyber security concepts, recognise common attacks and build a safe lab to practise defensive skills.

LIVE ONLINE **Max 8-10 hours**	CORPORATE (DAY-WISE) **1 day · Day 1**	SELF-PACED VIDEO **1-year LMS access**
BATCH SIZE **Max 10 learners**	NEXT BATCHES **1st of every month · weekends: first Saturday**	CERTIFICATE **Verifiable certificate of completion**

Foundation 1 day · This curriculum	**Essential** 2 days · Next step	**Intermediate** 3 days · Later	**Advanced** 5 days · Later

INSIDE THIS CURRICULUM

What you will achieve	Outcomes and level focus
Who should attend	Audience and prerequisites
Agenda	12 topics · Foundation
Hands-on labs	1 lab
Formats and fees	Live, 1:1, self-paced, corporate
Trainer and reviews	Rajesh Kumar
Enrolment	Batches, payment, contacts

WHY DEVOPSSCHOOL

- Rated 4.6 on Google
- 1,500+ verifiable certificates issued in the public registry
- Trainer Rajesh Kumar: 20 years in industry
- Small batches: max 10 learners, every session recorded

OUTCOMES

What you will achieve

By the end of the Cyber Security course path, you will be able to:

1

Defend systems and networks

Assess, harden and monitor networks, endpoints and web applications using industry tools.

2

Detect and respond confidently

Investigate alerts with SIEM and ATT&CK and run a structured incident response.

3

Lead risk-based security

Design zero-trust architecture and governance aligned with NIST CSF 2.0 and ISO 27001.

WHAT THE FOUNDATION LEVEL ADDS

Security concepts, threats and a home lab

Hands-on: Build an isolated security practice lab. Set up Kali Linux, Ubuntu and Windows virtual machines on a host-only network and capture a TLS handshake and DNS lookup in Wireshark.

WHO SHOULD ATTEND

- Beginners and working professionals who are new to Cyber Security and want a solid, hands-on start.
- Engineers, analysts, testers and students preparing to use Cyber Security on real work.
- Leads and managers who want first-hand familiarity with Cyber Security.

BEFORE YOU START

- No prior Cyber Security experience is needed.
- Basic computer skills and a laptop with a stable internet connection for the live sessions and labs.
- This curriculum includes every earlier level, so it is complete on its own.

AGENDA · FOUNDATION

Cyber Security Foundation Training agenda

12 topics. Each level builds on the one before it, so this curriculum lists every earlier level in full. Days are for corporate (day-wise) delivery; live online batches cover the same agenda in max 8-10 hours.

DAY 1 — Foundation: Security concepts, threats and a home lab

New at this level

1. Security fundamentals: CIA triad, authentication, authorization and accounting, non-repudiation and defence in depth
2. Threat landscape: malware, ransomware, phishing, social engineering, insider threats and supply chain attacks
3. Threat actors and motives: cybercriminals, hacktivists, nation-state groups and the cyber kill chain
4. Risk basics: assets, threats, vulnerabilities, likelihood, impact and risk treatment options
5. Networking for security: OSI and TCP/IP models, ports and protocols, DNS, HTTP and TLS handshakes
6. Cryptography basics: symmetric and asymmetric encryption, hashing, digital signatures, certificates and PKI
7. Identity basics: passwords, MFA, single sign-on and the principle of least privilege
8. Operating system security: Linux and Windows users, permissions, services, patching and logs
9. Security frameworks overview: NIST Cybersecurity Framework 2.0 functions, ISO/IEC 27001:2022 and CIS Controls v8
10. Security roles and careers: SOC analyst, penetration tester, security engineer, GRC analyst and incident responder
11. Law and ethics: authorised testing only, responsible disclosure, IT Act 2000, GDPR and India DPDP Act 2023
12. Lab setup: VirtualBox or VMware with Kali Linux, an Ubuntu server and a Windows target on an isolated network

PRACTICE

Hands-on labs

You build these yourself during the course, guided by the trainer.

FOUNDATION

Build an isolated security practice lab

Set up Kali Linux, Ubuntu and Windows virtual machines on a host-only network and capture a TLS handshake and DNS lookup in Wireshark.

HOW YOU CAN LEARN

Formats and fees

The same agenda in four formats. Fees are in Indian rupees as of November 2026; the course page shows them in your currency.

FORMAT	DURATION	WHAT YOU GET	FEE
Live & interactive (online)	Max 8-10 hours	Instructor-led public batch of max 10 learners with demos, labs, Q&A and assignment review. Weekday batches start on the 1st of every month, weekend batches on the first Saturday of every month.	**INR 34,999**
1:1 live training (online)	Max 8-10 hours, one-to-one	The same agenda, taught one-to-one by the trainer. Starts immediately, without waiting for the next batch; sessions planned around your working hours, at your pace.	**INR 99,999**
Self-paced video	1-year LMS access	All four Cyber Security levels, plus 20+ more courses and 50+ tools, at your own pace.	**INR 833/month** billed yearly at INR 9,996
Corporate (day-wise)	1 day for this level	A private batch for your team, on demand. Foundation 1 day, Essential 2, Intermediate 3, Advanced 5 (cumulative).	**Quote on request**

ASSESSMENT AND CERTIFICATE

Your progress is checked through hands-on labs and assignments at every level. On completion you receive a DevOpsSchool certificate of completion with a unique credential ID that anyone can verify at devopsschool.com/certificates.

INCLUDED WITH EVERY LIVE BATCH

- Every live session is recorded and stays in your LMS for a year.
- Can't attend your batch? Move to next month's batch.
- Free demo class before you pay.
- Free 10-15 minute call with an advisor or the trainer to check the course fits you.

YOUR TRAINER

Learn from Rajesh Kumar

Principal Architect, trainer and mentor in DevOps, SRE, DevSecOps and platform engineering, with 20 years across 8+ software MNCs, including Staff DevOps/SRE Engineer for a leading Japanese mobile-payment platform and Principal DevOps Architect and Manager in Europe.

20 years in industry	**200+** corporate trainings
10,000+ engineers mentored	**70+** organisations coached

REVIEWS

What learners say

Rated 4.6 on Google · more reviews at devopsschool.com/testimonials and in our video testimonials.

> “Rajesh is very good trainer. Rajesh was able to resolve our queries and question effectively. We really liked the hands-on examples covered during this training program.”
>
> Indrayani, India

> “The training was very useful and interactive. Rajesh helped develop the confidence of all.”
>
> Abhinav Gupta, Pune

START YOUR CYBER SECURITY TRAINING

Join the next batch

Weekday batches start on the 1st of every month and weekend batches on the first Saturday of every month, with max 10 learners each. 1:1 training can start immediately; corporate batches run on demand. We reply within 1 hour.
