DevOpsSchool

Course curriculum · November 2026

LEVEL 01 OF 04 · FOUNDATION

DevSecOps Foundation Training

Explain DevSecOps and the secure SDLC, and map SAST, DAST, SCA, IaC, compliance and vulnerability tools onto a CI/CD pipeline.

LIVE ONLINE **Max 8-10 hours**	CORPORATE (DAY-WISE) **1 day · Day 1**	SELF-PACED VIDEO **1-year LMS access**
BATCH SIZE **Max 10 learners**	NEXT BATCHES **1st of every month · weekends: first Saturday**	CERTIFICATE **Verifiable certificate of completion**

Foundation	**Essential**	**Intermediate**	**Advanced**
1 day · This curriculum	2 days · Next step	3 days · Later	5 days · Later

INSIDE THIS CURRICULUM

What you will achieve	Outcomes and level focus
Who should attend	Audience and prerequisites
Agenda	14 topics · Foundation
Hands-on labs	1 lab
Formats and fees	Live, 1:1, self-paced, corporate
Trainer and reviews	Rajesh Kumar
Enrolment	Batches, payment, contacts

WHY DEVOPSSCHOOL

- Rated 4.6 on Google
- 1,500+ verifiable certificates issued in the public registry
- Trainer Rajesh Kumar: 20 years in industry
- Small batches: max 10 learners, every session recorded

OUTCOMES

What you will achieve

By the end of the DevSecOps course path, you will be able to:

1

Embed security in CI/CD

Add SAST, SCA, secrets, container, IaC and DAST checks to pipelines so every change is tested for security.

2

Secure cloud-native workloads

Protect Kubernetes and cloud deployments with policy as code, runtime detection, managed secrets and signed artifacts.

3

Lead DevSecOps adoption

Use DSOMM, compliance as code and security metrics to plan and measure DevSecOps maturity across teams.

WHAT THE FOUNDATION LEVEL ADDS

DevSecOps concepts, secure SDLC and core tooling

Hands-on: Map security tools onto a pipeline. Take a Jenkins pipeline for a Java web application and add a SAST scan, an SCA dependency check and an OWASP ZAP baseline scan, then review the results.

WHO SHOULD ATTEND

- Beginners and working professionals who are new to DevSecOps and want a solid, hands-on start.
- Engineers, analysts, testers and students preparing to use DevSecOps on real work.
- Leads and managers who want first-hand familiarity with DevSecOps.

BEFORE YOU START

- No prior DevSecOps experience is needed.
- Basic computer skills and a laptop with a stable internet connection for the live sessions and labs.
- This curriculum includes every earlier level, so it is complete on its own.

AGENDA · FOUNDATION

DevSecOps Foundation Training agenda

14 topics. Each level builds on the one before it, so this curriculum lists every earlier level in full. Days are for corporate (day-wise) delivery; live online batches cover the same agenda in max 8-10 hours.

DAY 1 — Foundation: DevSecOps concepts, secure SDLC and core tooling

New at this level

1. Software development foundations: what software development and the SDLC are, SDLC models, Waterfall vs Agile, issues in the traditional way
2. DevOps and CI/CD refresher: what DevOps is, principles, benefits, continuous integration, delivery and deployment, deployment strategies
3. Typical CI/CD toolchain: Git, Bitbucket, Maven, Jenkins, Travis, Docker, Kubernetes, Ansible or Chef, Terraform, InSpec, OWASP ZAP
4. What is DevSecOps: DevSecOps as part of DevOps, OWASP (Open Web Application Security Project), CWE, defect classifications
5. Code analysis basics: static code analysis, dynamic code analysis, secure code review, where each fits in a typical CI/CD pipeline
6. Secure SDLC: activities and security gates across requirements, design, implementation, testing, deployment and maintenance
7. Security in the pipeline: embedding security in CI/CD, DevSecOps challenges with pentesting and vulnerability assessment
8. DevSecOps Maturity Model (DSOMM): maturity levels and tasks, its axes, moving from level 1 to level 4, level-specific practices
9. Software Component Analysis (SCA): SCA solutions, embedding SCA in the pipeline, Black Duck, Sonatype Nexus Lifecycle, JFrog Xray, Snyk
10. SAST: what static application security testing is, pipeline embedding, preventing secrets exposure, Checkmarx, Veracode, Fortify, Coverity
11. DAST: session management and AJAX crawling, SSL misconfiguration testing, baseline scans, scan frequencies, Burp, AppScan, OWASP ZAP
12. Infrastructure as Code: benefits, building blocks, configuration management systems, Ansible modules, tasks, roles and playbooks
13. Compliance as code: handling compliance requirements, using configuration management to achieve compliance, InSpec and OpenSCAP
14. Vulnerability management: managing vulnerabilities across the organization with DefectDojo and RiskSense (now part of Ivanti)

PRACTICE

Hands-on labs

You build these yourself during the course, guided by the trainer.

FOUNDATION

Map security tools onto a pipeline

Take a Jenkins pipeline for a Java web application and add a SAST scan, an SCA dependency check and an OWASP ZAP baseline scan, then review the results.

HOW YOU CAN LEARN

Formats and fees

The same agenda in four formats. Fees are in Indian rupees as of November 2026; the course page shows them in your currency.

FORMAT	DURATION	WHAT YOU GET	FEE
Live & interactive (online)	Max 8-10 hours	Instructor-led public batch of max 10 learners with demos, labs, Q&A and assignment review. Weekday batches start on the 1st of every month, weekend batches on the first Saturday of every month.	**INR 34,999**
1:1 live training (online)	Max 8-10 hours, one-to-one	The same agenda, taught one-to-one by the trainer. Starts immediately, without waiting for the next batch; sessions planned around your working hours, at your pace.	**INR 99,999**
Self-paced video	1-year LMS access	All four DevSecOps levels, plus 20+ more courses and 50+ tools, at your own pace.	**INR 833/month** billed yearly at INR 9,996
Corporate (day-wise)	1 day for this level	A private batch for your team, on demand. Foundation 1 day, Essential 2, Intermediate 3, Advanced 5 (cumulative).	**Quote on request**

ASSESSMENT AND CERTIFICATE

Your progress is checked through hands-on labs and assignments at every level. On completion you receive a DevOpsSchool certificate of completion with a unique credential ID that anyone can verify at devopsschool.com/certificates.

INCLUDED WITH EVERY LIVE BATCH

- Every live session is recorded and stays in your LMS for a year.
- Can't attend your batch? Move to next month's batch.
- Free demo class before you pay.
- Free 10-15 minute call with an advisor or the trainer to check the course fits you.

YOUR TRAINER

Learn from Rajesh Kumar

Principal Architect, trainer and mentor in DevOps, SRE, DevSecOps and platform engineering, with 20 years across 8+ software MNCs, including Staff DevOps/SRE Engineer for a leading Japanese mobile-payment platform and Principal DevOps Architect and Manager in Europe.

20 years in industry	**200+** corporate trainings
10,000+ engineers mentored	**70+** organisations coached

REVIEWS

What learners say

Rated 4.6 on Google · more reviews at devopsschool.com/testimonials and in our video testimonials.

> “Rajesh is very good trainer. Rajesh was able to resolve our queries and question effectively. We really liked the hands-on examples covered during this training program.”
>
> Indrayani, India

> “The training was very useful and interactive. Rajesh helped develop the confidence of all.”
>
> Abhinav Gupta, Pune

START YOUR DEVSECOPS TRAINING

Join the next batch

Weekday batches start on the 1st of every month and weekend batches on the first Saturday of every month, with max 10 learners each. 1:1 training can start immediately; corporate batches run on demand. We reply within 1 hour.
