DevOpsSchool

Course curriculum · November 2026

LEVEL 02 OF 04 · ESSENTIAL

Envoy Essential Training

Configure Envoy load balancing, health checks, retries, TLS and metrics for reliable everyday service traffic.

LIVE ONLINE **Max 8-10 hours**	CORPORATE (DAY-WISE) **2 days · Days 1-2**	SELF-PACED VIDEO **1-year LMS access**
BATCH SIZE **Max 10 learners**	NEXT BATCHES **1st of every month · weekends: first Saturday**	CERTIFICATE **Verifiable certificate of completion**

Foundation	Essential	Intermediate	Advanced
1 day · Included	2 days · This curriculum	3 days · Next step	5 days · Later

INSIDE THIS CURRICULUM

What you will achieve	Outcomes and level focus
Who should attend	Audience and prerequisites
Agenda	24 topics · Foundation to Essential
Hands-on labs	2 labs
Formats and fees	Live, 1:1, self-paced, corporate
Trainer and reviews	Rajesh Kumar
Enrolment	Batches, payment, contacts

WHY DEVOPSSCHOOL

- Rated 4.6 on Google
- 1,500+ verifiable certificates issued in the public registry
- Trainer Rajesh Kumar: 20 years in industry
- Small batches: max 10 learners, every session recorded

OUTCOMES

What you will achieve

By the end of the Envoy course path, you will be able to:

1

Configure Envoy with confidence

Build Envoy listeners, routes and clusters for edge and internal service traffic.

2

Secure and observe traffic

Apply mTLS, JWT, RBAC and rate limits and expose metrics, logs and traces.

3

Run Envoy at scale

Operate Envoy dynamically through xDS, Gateway API and service mesh with high availability.

WHAT THE ESSENTIAL LEVEL ADDS

Load balancing, resilience, TLS and observability

Hands-on: Ship a canary release through Envoy. Terminate TLS at Envoy, add health checks, retries and circuit breakers, then shift 10 percent of traffic to a new version and watch the metrics in Prometheus.

WHO SHOULD ATTEND

- Learners who know the basics of Envoy and want to use it confidently every day.
- Professionals taking over Envoy work on a live project.
- Teams agreeing on a common way of working with Envoy.

BEFORE YOU START

- The Foundation level, or equivalent hands-on experience.
- You can already: Install Envoy, understand listeners, filters, routes and clusters, and run your first working reverse proxy.
- Basic computer skills and a laptop with a stable internet connection for the live sessions and labs.
- This curriculum includes every earlier level, so it is complete on its own.

AGENDA · FOUNDATION TO ESSENTIAL

Envoy Essential Training agenda

24 topics. Each level builds on the one before it, so this curriculum lists every earlier level in full. Days are for corporate (day-wise) delivery; live online batches cover the same agenda in max 8-10 hours.

DAY 1 — Foundation: Proxy architecture, installation and first configuration

Included from Foundation

1. Why Envoy: L4 and L7 proxy, edge proxy, sidecar and service mesh data plane roles, CNCF graduated project
2. Envoy architecture: single process, worker threads, connection handling, non-blocking event loop and hot restart
3. Core building blocks: listeners, filter chains, network filters, HTTP filters, routes, clusters and endpoints
4. Installation: envoyproxy/envoy Docker images, official packages, func-e and verifying the version with envoy --version
5. Bootstrap configuration: envoy.yaml structure, static_resources, node identity and the admin block
6. HTTP connection manager: codec types, stat_prefix, route_config, virtual hosts and the router filter
7. Routing basics: prefix, path and header matching, host rewrite and direct responses
8. Clusters: STATIC, STRICT_DNS and LOGICAL_DNS discovery, connect timeouts and load assignment
9. Admin interface: port 9901, /stats, /clusters, /config_dump, /ready and /logging
10. Access logging: file and stdout access logs, default format and custom format strings
11. Validating configuration: envoy --mode validate, reading startup logs and common YAML errors
12. First example: front two backend services with path-based routing on a single listener

DAY 2 — Essential: Load balancing, resilience, TLS and observability

New at this level

13. Load balancing policies: round robin, least request, random, ring hash and Maglev, plus locality weighting
14. Health checking: active HTTP, TCP and gRPC health checks and passive outlier detection
15. Timeouts and retries: route timeouts, idle timeouts, retry_on conditions, retry budgets and backoff
16. Circuit breakers: max connections, pending requests, requests and retries per priority
17. TLS termination: DownstreamTlsContext, certificates, SNI-based filter chain matching and ALPN
18. Upstream TLS and mTLS: UpstreamTlsContext, client certificates and validation contexts
19. Traffic shifting: weighted clusters for canary and blue-green releases, request mirroring
20. Header manipulation: adding and removing request and response headers, x-forwarded-for and x-request-id
21. gRPC and HTTP/2: proxying gRPC services, gRPC-Web filter and HTTP/2 upstream settings
22. Statistics: counters, gauges and histograms, Prometheus scraping via /stats/prometheus
23. Distributed tracing: OpenTelemetry tracer, trace context propagation and sampling
24. TCP proxy and other protocols: tcp_proxy filter, Redis and MySQL network filters overview

PRACTICE

Hands-on labs

You build these yourself during the course, guided by the trainer.

FOUNDATION

Run Envoy as a reverse proxy

Start Envoy in Docker in front of two backend services, route by path prefix and inspect traffic through the admin interface and access logs.

ESSENTIAL

Ship a canary release through Envoy

Terminate TLS at Envoy, add health checks, retries and circuit breakers, then shift 10 percent of traffic to a new version and watch the metrics in Prometheus.

HOW YOU CAN LEARN

Formats and fees

The same agenda in four formats. Fees are in Indian rupees as of November 2026; the course page shows them in your currency.

FORMAT	DURATION	WHAT YOU GET	FEE
Live & interactive (online)	Max 8-10 hours	Instructor-led public batch of max 10 learners with demos, labs, Q&A and assignment review. Weekday batches start on the 1st of every month, weekend batches on the first Saturday of every month.	**INR 34,999**
1:1 live training (online)	Max 8-10 hours, one-to-one	The same agenda, taught one-to-one by the trainer. Starts immediately, without waiting for the next batch; sessions planned around your working hours, at your pace.	**INR 99,999**
Self-paced video	1-year LMS access	All four Envoy levels, plus 20+ more courses and 50+ tools, at your own pace.	**INR 833/month** billed yearly at INR 9,996
Corporate (day-wise)	2 days for this level	A private batch for your team, on demand. Foundation 1 day, Essential 2, Intermediate 3, Advanced 5 (cumulative).	**Quote on request**

ASSESSMENT AND CERTIFICATE

Your progress is checked through hands-on labs and assignments at every level. On completion you receive a DevOpsSchool certificate of completion with a unique credential ID that anyone can verify at devopsschool.com/certificates.

INCLUDED WITH EVERY LIVE BATCH

- Every live session is recorded and stays in your LMS for a year.
- Can't attend your batch? Move to next month's batch.
- Free demo class before you pay.
- Free 10-15 minute call with an advisor or the trainer to check the course fits you.

YOUR TRAINER

Learn from Rajesh Kumar

Principal Architect, trainer and mentor in DevOps, SRE, DevSecOps and platform engineering, with 20 years across 8+ software MNCs, including Staff DevOps/SRE Engineer for a leading Japanese mobile-payment platform and Principal DevOps Architect and Manager in Europe.

Profile: www.rajeshkumar.xyz · Videos: youtube.com/@TheDevOpsSchool

20 years in industry	**200+** corporate trainings
10,000+ engineers mentored	**70+** organisations coached

REVIEWS

What learners say

Rated 4.6 on Google · more reviews at devopsschool.com/testimonials and in our video testimonials.

> “Rajesh is very good trainer. Rajesh was able to resolve our queries and question effectively. We really liked the hands-on examples covered during this training program.”
>
> Indrayani, India

> “The training was very useful and interactive. Rajesh helped develop the confidence of all.”
>
> Abhinav Gupta, Pune

START YOUR ENVOY TRAINING

Join the next batch

Weekday batches start on the 1st of every month and weekend batches on the first Saturday of every month, with max 10 learners each. 1:1 training can start immediately; corporate batches run on demand. We reply within 1 hour.
