OUTCOMES

What you will achieve

By the end of the Finops course path, you will be able to:

1

Make cloud spend visible

Allocate, report and forecast cloud costs with tagging, FOCUS data and dashboards.

2

Optimise usage and rates

Reduce waste and rates with rightsizing, scheduling, commitments and spot capacity.

3

Run a FinOps practice

Build the operating model, governance and KPIs that tie cloud cost to business value.

WHAT THE ESSENTIAL LEVEL ADDS

Allocation, tagging, budgets and showback

Hands-on: Build a showback dashboard with alerts. Enforce a tagging policy, build a cost dashboard by team and environment from billing exports, and configure budgets and anomaly alerts.

WHO SHOULD ATTEND

- Learners who know the basics of Finops and want to use it confidently every day.
- Professionals taking over Finops work on a live project.
- Teams agreeing on a common way of working with Finops.

BEFORE YOU START

- The Foundation level, or equivalent hands-on experience.
- You can already: Explain the FinOps Framework, read a cloud bill and identify where your organisation's cloud spend comes from.
- Basic computer skills and a laptop with a stable internet connection for the live sessions and labs.
- This curriculum includes every earlier level, so it is complete on its own.
