Course curriculum · November 2026

LEVEL 01 OF 04 · FOUNDATION

Fortify Foundation Training

Install Fortify Static Code Analyzer, understand how translation and scanning work, and produce your first FPR results file.

LIVE ONLINE **Max 8-10 hours**	CORPORATE (DAY-WISE) **1 day · Day 1**	SELF-PACED VIDEO **1-year LMS access**
BATCH SIZE **Max 10 learners**	NEXT BATCHES **1st of every month · weekends: first Saturday**	CERTIFICATE **Verifiable certificate of completion**

Foundation 1 day · This curriculum	**Essential** 2 days · Next step	**Intermediate** 3 days · Later	**Advanced** 5 days · Later

INSIDE THIS CURRICULUM

What you will achieve	Outcomes and level focus
Who should attend	Audience and prerequisites
Agenda	11 topics · Foundation
Hands-on labs	1 lab
Formats and fees	Live, 1:1, self-paced, corporate
Trainer and reviews	Rajesh Kumar
Enrolment	Batches, payment, contacts

WHY DEVOPSSCHOOL

- Rated 4.6 on Google
- 1,500+ verifiable certificates issued in the public registry
- Trainer Rajesh Kumar: 20 years in industry
- Small batches: max 10 learners, every session recorded

OUTCOMES

What you will achieve

By the end of the Fortify course path, you will be able to:

1

Run reliable SAST scans

Translate and scan Java, .NET, C/C++, JavaScript and other code bases with Fortify Static Code Analyzer from the command line or the build.

2

Automate security in pipelines

Wire Fortify into Jenkins and other CI pipelines with uploads to Software Security Center and build-breaking security gates.

3

Triage and remediate findings

Audit results in Audit Workbench and IDE plugins, tune rules and filters, and drive fixes with development teams.

WHAT THE FOUNDATION LEVEL ADDS

SAST concepts, installation and first scan

Hands-on: Install Fortify and run a first scan. Install Static Code Analyzer, update the rulepacks, then translate and scan a small Java web application into an FPR file and review its top issues.

WHO SHOULD ATTEND

- Beginners and working professionals who are new to Fortify and want a solid, hands-on start.
- Engineers, analysts, testers and students preparing to use Fortify on real work.
- Leads and managers who want first-hand familiarity with Fortify.

BEFORE YOU START

- No prior Fortify experience is needed.
- Basic computer skills and a laptop with a stable internet connection for the live sessions and labs.
- This curriculum includes every earlier level, so it is complete on its own.

AGENDA · FOUNDATION

Fortify Foundation Training agenda

11 topics. Each level builds on the one before it, so this curriculum lists every earlier level in full. Days are for corporate (day-wise) delivery; live online batches cover the same agenda in max 8-10 hours.

DAY 1 — Foundation: SAST concepts, installation and first scan

New at this level

1. Introduction: static application security testing and the OpenText Fortify family (SCA, SSC, ScanCentral, Fortify on Demand)
2. Fortify software system requirements: supported OS, JDK, memory sizing, languages and build tools
3. Fortify Static Code Analyzer installation guide: installer options, fortify.license and checking sourceanalyzer -version
4. Rulepacks: Secure Coding Rulepacks, fortifyupdate for online updates and offline rulepack installation
5. Analysis process overview: translation phase, scan phase, build IDs (-b) and the FPR results file
6. Analyzers: dataflow, control flow, semantic, structural, configuration and buffer analyzers
7. Translating Java code: sourceanalyzer -b with -cp, -source level, JSP files and project layout
8. First scan: sourceanalyzer -b demo -scan -f demo.fpr and opening the results
9. Vulnerability categories: Seven Pernicious Kingdoms, OWASP Top 10 and CWE mapping of findings
10. Issue priority: Critical, High, Medium and Low folders based on impact and likelihood
11. Bundled example files: scanning the demo projects shipped with Static Code Analyzer to verify the setup

PRACTICE

Hands-on labs

You build these yourself during the course, guided by the trainer.

FOUNDATION

Install Fortify and run a first scan

Install Static Code Analyzer, update the rulepacks, then translate and scan a small Java web application into an FPR file and review its top issues.

HOW YOU CAN LEARN

Formats and fees

The same agenda in four formats. Fees are in Indian rupees as of November 2026; the course page shows them in your currency.

FORMAT	DURATION	WHAT YOU GET	FEE
Live & interactive (online)	Max 8-10 hours	Instructor-led public batch of max 10 learners with demos, labs, Q&A and assignment review. Weekday batches start on the 1st of every month, weekend batches on the first Saturday of every month.	**INR 34,999**
1:1 live training (online)	Max 8-10 hours, one-to-one	The same agenda, taught one-to-one by the trainer. Starts immediately, without waiting for the next batch; sessions planned around your working hours, at your pace.	**INR 99,999**
Self-paced video	1-year LMS access	All four Fortify levels, plus 20+ more courses and 50+ tools, at your own pace.	**INR 833/month** billed yearly at INR 9,996
Corporate (day-wise)	1 day for this level	A private batch for your team, on demand. Foundation 1 day, Essential 2, Intermediate 3, Advanced 5 (cumulative).	**Quote on request**

ASSESSMENT AND CERTIFICATE

Your progress is checked through hands-on labs and assignments at every level. On completion you receive a DevOpsSchool certificate of completion with a unique credential ID that anyone can verify at devopsschool.com/certificates.

INCLUDED WITH EVERY LIVE BATCH

- Every live session is recorded and stays in your LMS for a year.
- Can't attend your batch? Move to next month's batch.
- Free demo class before you pay.
- Free 10-15 minute call with an advisor or the trainer to check the course fits you.

YOUR TRAINER

Learn from Rajesh Kumar

Principal Architect, trainer and mentor in DevOps, SRE, DevSecOps and platform engineering, with 20 years across 8+ software MNCs, including Staff DevOps/SRE Engineer for a leading Japanese mobile-payment platform and Principal DevOps Architect and Manager in Europe.
