DevOpsSchool

Course curriculum · November 2026

LEVEL 01 OF 04 · FOUNDATION

Itops Foundation Training

Understand what IT operations owns, navigate servers, networks and logs, and set up your first monitored server with a runbook.

LIVE ONLINE **Max 8-10 hours**	CORPORATE (DAY-WISE) **1 day · Day 1**	SELF-PACED VIDEO **1-year LMS access**
BATCH SIZE **Max 10 learners**	NEXT BATCHES **1st of every month · weekends: first Saturday**	CERTIFICATE **Verifiable certificate of completion**

Foundation	Essential	Intermediate	Advanced
1 day · This curriculum	2 days · Next step	3 days · Later	5 days · Later

INSIDE THIS CURRICULUM

What you will achieve	Outcomes and level focus
Who should attend	Audience and prerequisites
Agenda	12 topics · Foundation
Hands-on labs	1 lab
Formats and fees	Live, 1:1, self-paced, corporate
Trainer and reviews	Rajesh Kumar
Enrolment	Batches, payment, contacts

WHY DEVOPSSCHOOL

- Rated 4.6 on Google
- 1,500+ verifiable certificates issued in the public registry
- Trainer Rajesh Kumar: 20 years in industry
- Small batches: max 10 learners, every session recorded

OUTCOMES

What you will achieve

By the end of the Itops course path, you will be able to:

1

Run reliable daily operations

Monitor, patch, back up and support servers and services with clear runbooks, alerts and incident workflows.

2

Automate routine operations work

Replace repetitive manual tasks with Ansible, scripts and ChatOps so the team spends time on improvements.

3

Design resilient operations

Set SLOs, plan capacity, high availability and disaster recovery, and govern operations at enterprise scale.

WHAT THE FOUNDATION LEVEL ADDS

IT operations scope, infrastructure and first monitoring

Hands-on: Monitor a server and follow a runbook. Install a monitoring agent on a Linux VM, set disk and CPU alert thresholds, trigger an alert and resolve it through a ticket using a written runbook.

WHO SHOULD ATTEND

- Beginners and working professionals who are new to Itops and want a solid, hands-on start.
- Engineers, analysts, testers and students preparing to use Itops on real work.
- Leads and managers who want first-hand familiarity with Itops.

BEFORE YOU START

- No prior Itops experience is needed.
- Basic computer skills and a laptop with a stable internet connection for the live sessions and labs.
- This curriculum includes every earlier level, so it is complete on its own.

AGENDA · FOUNDATION

Itops Foundation Training agenda

12 topics. Each level builds on the one before it, so this curriculum lists every earlier level in full. Days are for corporate (day-wise) delivery; live online batches cover the same agenda in max 8-10 hours.

DAY 1 — Foundation: IT operations scope, infrastructure and first monitoring

New at this level

1. IT operations defined: ITOps scope and responsibilities, and how it differs from DevOps, SRE and a NOC
2. Infrastructure building blocks: physical and virtual servers, storage, networks, DNS, load balancers and cloud services
3. Operating systems for operations: Linux and Windows Server basics, services, users, processes and system logs
4. Networking essentials: TCP/IP, subnets, ports, DNS resolution, ping, traceroute, dig and ss
5. Service management basics: incidents, service requests, changes and problems in an ITSM ticketing tool
6. Monitoring basics: availability, CPU, memory, disk and network metrics, thresholds and alert states
7. Log basics: syslog, journalctl, Windows Event Viewer and why logs should be centralised
8. Runbooks and standard operating procedures: writing, versioning and following them during a shift
9. Access basics: accounts, groups, SSH keys, least privilege and handling shared credentials safely
10. Backup fundamentals: full, incremental and differential backups, retention and the 3-2-1 rule
11. Shift operations: on-call rotations, escalation paths, shift handover notes and stakeholder communication
12. Lab environment setup: Linux and Windows VMs, a monitoring agent and a ticket queue for exercises

PRACTICE

Hands-on labs

You build these yourself during the course, guided by the trainer.

FOUNDATION

Monitor a server and follow a runbook

Install a monitoring agent on a Linux VM, set disk and CPU alert thresholds, trigger an alert and resolve it through a ticket using a written runbook.

HOW YOU CAN LEARN

Formats and fees

The same agenda in four formats. Fees are in Indian rupees as of November 2026; the course page shows them in your currency.

FORMAT	DURATION	WHAT YOU GET	FEE
Live & interactive (online)	Max 8-10 hours	Instructor-led public batch of max 10 learners with demos, labs, Q&A and assignment review. Weekday batches start on the 1st of every month, weekend batches on the first Saturday of every month.	**INR 34,999**
1:1 live training (online)	Max 8-10 hours, one-to-one	The same agenda, taught one-to-one by the trainer. Starts immediately, without waiting for the next batch; sessions planned around your working hours, at your pace.	**INR 99,999**
Self-paced video	1-year LMS access	All four Itops levels, plus 20+ more courses and 50+ tools, at your own pace.	**INR 833/month** billed yearly at INR 9,996
Corporate (day-wise)	1 day for this level	A private batch for your team, on demand. Foundation 1 day, Essential 2, Intermediate 3, Advanced 5 (cumulative).	**Quote on request**

ASSESSMENT AND CERTIFICATE

Your progress is checked through hands-on labs and assignments at every level. On completion you receive a DevOpsSchool certificate of completion with a unique credential ID that anyone can verify at devopsschool.com/certificates.

INCLUDED WITH EVERY LIVE BATCH

- Every live session is recorded and stays in your LMS for a year.
- Can't attend your batch? Move to next month's batch.
- Free demo class before you pay.
- Free 10-15 minute call with an advisor or the trainer to check the course fits you.

YOUR TRAINER

Learn from Rajesh Kumar

Principal Architect, trainer and mentor in DevOps, SRE, DevSecOps and platform engineering, with 20 years across 8+ software MNCs, including Staff DevOps/SRE Engineer for a leading Japanese mobile-payment platform and Principal DevOps Architect and Manager in Europe.
