DevOpsSchool

Course curriculum · November 2026

LEVEL 01 OF 04 · FOUNDATION

Kapitan Foundation Training

Install Kapitan, model environments in an inventory and compile your first manifests from one source.

LIVE ONLINE **Max 8-10 hours**	CORPORATE (DAY-WISE) **1 day · Day 1**	SELF-PACED VIDEO **1-year LMS access**
BATCH SIZE **Max 10 learners**	NEXT BATCHES **1st of every month · weekends: first Saturday**	CERTIFICATE **Verifiable certificate of completion**

Foundation	Essential	Intermediate	Advanced
1 day · This curriculum	2 days · Next step	3 days · Later	5 days · Later

INSIDE THIS CURRICULUM

What you will achieve	Outcomes and level focus
Who should attend	Audience and prerequisites
Agenda	11 topics · Foundation
Hands-on labs	1 lab
Formats and fees	Live, 1:1, self-paced, corporate
Trainer and reviews	Rajesh Kumar
Enrolment	Batches, payment, contacts

WHY DEVOPSSCHOOL

- Rated 4.6 on Google
- 1,500+ verifiable certificates issued in the public registry
- Trainer Rajesh Kumar: 20 years in industry
- Small batches: max 10 learners, every session recorded

OUTCOMES

What you will achieve

By the end of the Kapitan course path, you will be able to:

1

Model configuration once

Describe every environment in a single Kapitan inventory and generate consistent manifests from it.

2

Manage secrets safely

Keep secrets encrypted in Git with Kapitan refs and reveal them only at deploy time.

3

Automate delivery with GitOps

Compile, validate and ship Kapitan output through CI pipelines and GitOps tools.

WHAT THE FOUNDATION LEVEL ADDS

Kapitan concepts, inventory and first compile

Hands-on: Compile two environments from one inventory. Create dev and prod targets that share classes, override a few parameters per target and compile Kubernetes manifests and a README for both.

WHO SHOULD ATTEND

- Beginners and working professionals who are new to Kapitan and want a solid, hands-on start.
- Engineers, analysts, testers and students preparing to use Kapitan on real work.
- Leads and managers who want first-hand familiarity with Kapitan.

BEFORE YOU START

- No prior Kapitan experience is needed.
- Basic computer skills and a laptop with a stable internet connection for the live sessions and labs.
- This curriculum includes every earlier level, so it is complete on its own.

AGENDA · FOUNDATION

Kapitan Foundation Training agenda

11 topics. Each level builds on the one before it, so this curriculum lists every earlier level in full. Days are for corporate (day-wise) delivery; live online batches cover the same agenda in max 8-10 hours.

DAY 1 — Foundation: Kapitan concepts, inventory and first compile

New at this level

1. What Kapitan is: a configuration management tool that generates Kubernetes, Terraform, scripts and docs from one inventory
2. Why Kapitan: removing duplication across environments compared with Helm, Kustomize and plain Jsonnet
3. Installing Kapitan: pip install kapitan, the kapicorp/kapitan container image and kapitan --version
4. Project layout: inventory/targets, inventory/classes, components, Jinja2 sources and the compiled directory
5. Inventory basics: targets and classes in YAML, parameters and class inheritance
6. Parameter interpolation: ${...} references between parameters and target-specific variables
7. Inspecting the inventory: kapitan inventory -t and kapitan searchvar
8. First compile: kapitan compile, selecting targets with -t and reading the compiled output
9. Input types overview: jinja2, jsonnet, kadet (Python), helm, copy and external
10. Jinja2 input: rendering text files, scripts and README documentation from inventory values
11. Kapitan with Git: committing compiled output and reviewing diffs as the change record

PRACTICE

Hands-on labs

You build these yourself during the course, guided by the trainer.

FOUNDATION

Compile two environments from one inventory

Create dev and prod targets that share classes, override a few parameters per target and compile Kubernetes manifests and a README for both.

HOW YOU CAN LEARN

Formats and fees

The same agenda in four formats. Fees are in Indian rupees as of November 2026; the course page shows them in your currency.

FORMAT	DURATION	WHAT YOU GET	FEE
Live & interactive (online)	Max 8-10 hours	Instructor-led public batch of max 10 learners with demos, labs, Q&A and assignment review. Weekday batches start on the 1st of every month, weekend batches on the first Saturday of every month.	**INR 34,999**
1:1 live training (online)	Max 8-10 hours, one-to-one	The same agenda, taught one-to-one by the trainer. Starts immediately, without waiting for the next batch; sessions planned around your working hours, at your pace.	**INR 99,999**
Self-paced video	1-year LMS access	All four Kapitan levels, plus 20+ more courses and 50+ tools, at your own pace.	**INR 833/month** billed yearly at INR 9,996
Corporate (day-wise)	1 day for this level	A private batch for your team, on demand. Foundation 1 day, Essential 2, Intermediate 3, Advanced 5 (cumulative).	**Quote on request**

ASSESSMENT AND CERTIFICATE

Your progress is checked through hands-on labs and assignments at every level. On completion you receive a DevOpsSchool certificate of completion with a unique credential ID that anyone can verify at devopsschool.com/certificates.

INCLUDED WITH EVERY LIVE BATCH

- Every live session is recorded and stays in your LMS for a year.
- Can't attend your batch? Move to next month's batch.
- Free demo class before you pay.
- Free 10-15 minute call with an advisor or the trainer to check the course fits you.

YOUR TRAINER

Learn from Rajesh Kumar

Principal Architect, trainer and mentor in DevOps, SRE, DevSecOps and platform engineering, with 20 years across 8+ software MNCs, including Staff DevOps/SRE Engineer for a leading Japanese mobile-payment platform and Principal DevOps Architect and Manager in Europe.
