DevOpsSchool

Course curriculum · November 2026

LEVEL 01 OF 04 · FOUNDATION

Mobile Security Foundation Training

Understand Android and iOS security architecture, set up a mobile testing lab with an emulator and Burp proxy and inspect a first app.

LIVE ONLINE **Max 8-10 hours**	CORPORATE (DAY-WISE) **1 day · Day 1**	SELF-PACED VIDEO **1-year LMS access**
BATCH SIZE **Max 10 learners**	NEXT BATCHES **1st of every month · weekends: first Saturday**	CERTIFICATE **Verifiable certificate of completion**

Foundation 1 day · This curriculum	**Essential** 2 days · Next step	**Intermediate** 3 days · Later	**Advanced** 5 days · Later

INSIDE THIS CURRICULUM

What you will achieve	Outcomes and level focus
Who should attend	Audience and prerequisites
Agenda	11 topics · Foundation
Hands-on labs	1 lab
Formats and fees	Live, 1:1, self-paced, corporate
Trainer and reviews	Rajesh Kumar
Enrolment	Batches, payment, contacts

WHY DEVOPSSCHOOL

- Rated 4.6 on Google
- 1,500+ verifiable certificates issued in the public registry
- Trainer Rajesh Kumar: 20 years in industry
- Small batches: max 10 learners, every session recorded

OUTCOMES

What you will achieve

By the end of the Mobile Security course path, you will be able to:

1

Understand mobile platform security

Explain Android and iOS security architecture and where real mobile apps go wrong.

2

Test mobile apps thoroughly

Perform static, dynamic and runtime testing of Android and iOS apps against OWASP MASVS.

3

Harden apps and fleets

Recommend and verify app hardening, secure backends and enterprise mobile controls.

WHAT THE FOUNDATION LEVEL ADDS

Android and iOS security architecture, lab setup

Hands-on: Build your mobile testing lab. Set up an Android emulator with ADB and Burp interception, install a deliberately vulnerable app and map its components and traffic.

WHO SHOULD ATTEND

- Beginners and working professionals who are new to Mobile Security and want a solid, hands-on start.
- Engineers, analysts, testers and students preparing to use Mobile Security on real work.
- Leads and managers who want first-hand familiarity with Mobile Security.

BEFORE YOU START

- No prior Mobile Security experience is needed.
- Basic computer skills and a laptop with a stable internet connection for the live sessions and labs.
- This curriculum includes every earlier level, so it is complete on its own.

AGENDA · FOUNDATION

Mobile Security Foundation Training agenda

11 topics. Each level builds on the one before it, so this curriculum lists every earlier level in full. Days are for corporate (day-wise) delivery; live online batches cover the same agenda in max 8-10 hours.

DAY 1 — Foundation: Android and iOS security architecture, lab setup

New at this level

1. Mobile threat landscape: OWASP Mobile Top 10 (2024), OWASP MASVS and the MASTG testing guide
2. Introduction to Android: Android security architecture, Linux kernel, app sandbox, SELinux, permissions and verified boot
3. Android application components: activities, services, broadcast receivers, content providers, intents and the manifest
4. What is ADB: connecting devices, installing apps, shell, logcat and pulling files
5. Setting up an Android pentesting environment: Genymotion or Android Studio emulator, a rooted test device and tools
6. Setting up a Burp proxy: device proxy settings and installing the Burp CA certificate
7. iOS application security basics: MVC and event-driven architecture and the ARM (arm64) processor
8. iOS security mechanisms: security architecture, secure boot chain and loading trusted applications with code signing
9. iOS isolation and protection: application isolation (sandbox), data encryption with data protection classes and Secure Enclave
10. iOS network security: App Transport Security and system TLS behaviour
11. First look at an app: APK and IPA structure, AndroidManifest.xml and Info.plist

PRACTICE

Hands-on labs

You build these yourself during the course, guided by the trainer.

FOUNDATION

Build your mobile testing lab

Set up an Android emulator with ADB and Burp interception, install a deliberately vulnerable app and map its components and traffic.

HOW YOU CAN LEARN

Formats and fees

The same agenda in four formats. Fees are in Indian rupees as of November 2026; the course page shows them in your currency.

FORMAT	DURATION	WHAT YOU GET	FEE
Live & interactive (online)	Max 8-10 hours	Instructor-led public batch of max 10 learners with demos, labs, Q&A and assignment review. Weekday batches start on the 1st of every month, weekend batches on the first Saturday of every month.	**INR 34,999**
1:1 live training (online)	Max 8-10 hours, one-to-one	The same agenda, taught one-to-one by the trainer. Starts immediately, without waiting for the next batch; sessions planned around your working hours, at your pace.	**INR 99,999**
Self-paced video	1-year LMS access	All four Mobile Security levels, plus 20+ more courses and 50+ tools, at your own pace.	**INR 833/month** billed yearly at INR 9,996
Corporate (day-wise)	1 day for this level	A private batch for your team, on demand. Foundation 1 day, Essential 2, Intermediate 3, Advanced 5 (cumulative).	**Quote on request**

ASSESSMENT AND CERTIFICATE

Your progress is checked through hands-on labs and assignments at every level. On completion you receive a DevOpsSchool certificate of completion with a unique credential ID that anyone can verify at devopsschool.com/certificates.

INCLUDED WITH EVERY LIVE BATCH

- Every live session is recorded and stays in your LMS for a year.
- Can't attend your batch? Move to next month's batch.
- Free demo class before you pay.
- Free 10-15 minute call with an advisor or the trainer to check the course fits you.

YOUR TRAINER

Learn from Rajesh Kumar

Principal Architect, trainer and mentor in DevOps, SRE, DevSecOps and platform engineering, with 20 years across 8+ software MNCs, including Staff DevOps/SRE Engineer for a leading Japanese mobile-payment platform and Principal DevOps Architect and Manager in Europe.

20 years in industry	**200+** corporate trainings
10,000+ engineers mentored	**70+** organisations coached

REVIEWS

What learners say

Rated 4.6 on Google · more reviews at devopsschool.com/testimonials and in our video testimonials.

> “Rajesh is very good trainer. Rajesh was able to resolve our queries and question effectively. We really liked the hands-on examples covered during this training program.”
>
> Indrayani, India

> “The training was very useful and interactive. Rajesh helped develop the confidence of all.”
>
> Abhinav Gupta, Pune

START YOUR MOBILE SECURITY TRAINING

Join the next batch

Weekday batches start on the 1st of every month and weekend batches on the first Saturday of every month, with max 10 learners each. 1:1 training can start immediately; corporate batches run on demand. We reply within 1 hour.
