OUTCOMES

What you will achieve

By the end of the New Relic course path, you will be able to:

1

Instrument applications with New Relic

Install and configure New Relic agents and read APM data to understand application performance.

2

Diagnose and alert effectively

Find bottlenecks with traces, profiling and error analytics and alert teams before users notice.

3

Deliver full-stack observability

Combine infrastructure, logs, synthetics, browser, security and NRQL dashboards into one observability practice.

WHAT THE FOUNDATION LEVEL ADDS

APM and observability concepts, agent installation

Hands-on: Instrument your first applications. Create a New Relic account, install the Java and PHP agents on demo apps and confirm transactions in the APM overview page.

WHO SHOULD ATTEND

- Beginners and working professionals who are new to New Relic and want a solid, hands-on start.
- Engineers, analysts, testers and students preparing to use New Relic on real work.
- Leads and managers who want first-hand familiarity with New Relic.

BEFORE YOU START

- No prior New Relic experience is needed.
- Basic computer skills and a laptop with a stable internet connection for the live sessions and labs.
- This curriculum includes every earlier level, so it is complete on its own.

AGENDA · FOUNDATION

New Relic Foundation Training agenda

13 topics. Each level builds on the one before it, so this curriculum lists every earlier level in full. Days are for corporate (day-wise) delivery; live online batches cover the same agenda in max 8-10 hours.

DAY 1 — Foundation: APM and observability concepts, agent installation

New at this level

1. Introduction and overview of New Relic: what is application performance management and why it is needed
2. What is application performance: response time, throughput, errors and user satisfaction
3. APM benefits and selection criteria: why New Relic for APM, what New Relic APM is and how it works
4. Observability fundamentals: definitions, importance, metrics, logs and traces and observability versus monitoring
5. New Relic architecture and terminology: agents, entities, accounts, ingest and the NRDB telemetry database
6. Understanding transactions and transaction traces: web and non-web transactions and trace segments
7. Register a New Relic account: free tier sign-up, license and user keys and guided install
8. Installing a Java agent to monitor your Java application: javaagent flag and first data
9. PHP and .NET agents: installing a PHP agent and the New Relic agent for .NET Framework applications
10. Docker agent: installing a Docker-based agent to monitor your Docker-based application
11. Configuration settings: newrelic.yml and agent settings such as app name, logging and environment variables
12. Monitoring using New Relic: view your applications index, the APM overview page and agent-specific UI
13. First look at data: New Relic default graphs for throughput, response time and error rate

PRACTICE

Hands-on labs

You build these yourself during the course, guided by the trainer.

FOUNDATION

Instrument your first applications

Create a New Relic account, install the Java and PHP agents on demo apps and confirm transactions in the APM overview page.

HOW YOU CAN LEARN
