Perforce Advance Training

Day - 1

-
  - Perforce system overview and user interfaces
  - Perforce system overview and user interfaces
  - Basic user operations: creating workspaces, working with files and changelists, submitting changelists,
  - Keeping workspaces in sync with the depot
  - Parallel development: merging files, resolving file conflicts
  - Branching and codeline management: creating branches, integrating changes between branches, using named
  - Branch views
  - Perforce Administration - Basic
  - Installation
  - Setup

  - Protections
  - Depots
  - Email Reviews
  - Perforce Jobspec
  - Backup and Recovery
  - Maintenance
  - Monitoring
  - Trigger Capabilities Overview
  - Perforce Administration - Advance
  - P4Broker
  - P4Web
  - P4Proxy
  - Replication
  - Security
  - Advanced Administration
  - Tools
  - Introduction to Scripting with Perforce

-
  - Installing P4 on UNIX and OS X
  - Installing P4 on Windows
  - Verifying the installation

Day - 2

- **P**   **ffh**
  - Configuration overview
  - Configuring Perforce settings
  - Defining client workspaces
  - Verifying connections
  - Refining workspace views
  - Changing the location of your workspace
  - Configuring workspace options
  - Configuring submit options
  - Configuring line-ending settings
  - Deleting client workspace specifications
  - Security

-          **ffh**
  - Command-line syntax
  - Wildcards
  - Specifying file revisions
  - Reporting commands
  - Using Perforce forms
  - Help – p4 help, p4 info, "File Specifications", "Views", "Global Options", "File Types"
  - Client workspace – p4 clean, p4 client, p4 clients, p4 flush, p4 have, p4 sync, p4 update, p4 where, p4 workspace, p4 workspaces

- Changelists – p4 change, p4 changelist, p4 changes, p4 changelists, p4 describe, p4 filelog, p4 opened, p4 reopen, p4 review, p4 shelve, p4 submit, p4 unshelve

- Branching and Merging – p4 branch, p4 branches, p4 copy, p4 integrate, p4 integrated, p4 label, p4 labels, p4 labelsync, p4 list, p4 merge, p4 populate, p4 tag, p4 resolve, p4 resolved

- Security – p4 login, p4 logout, p4 passwd,

- Environment – p4 set, "Environment and Registry Variables", P4CLIENT, P4CONFIG, P4EDITOR, P4HOST, P4PASSWD, P4PCACHE, P4PFSIZE, P4POPTIONS, P4PORT, P4ROOT,P4TICKETS, P4USER, PWD, TMP, TEMP

Day - 3	Day - 4

• **P   ffh**
    o Managing changelists
    o Diffing files
    o Working offline
 	
• **P**
    o How to resolve conflicts
    o Locking files
	• **ffh ffh**
	    o Basic terminology
	    o Organizing the depot
	    o Populating Codelines
	    o Branching Codelines
	    o Integrating changes
	
	•
	    o Untagging files
	    o Listing files tagged by a label
	    o Deleting labels
