DevOpsSchool

Course curriculum · November 2026

LEVEL 02 OF 04 · ESSENTIAL

Predictive Analytics Essential Training

Prepare real data, build regression and classification models, evaluate them properly and tune them without overfitting.

LIVE ONLINE **Max 8-10 hours**	CORPORATE (DAY-WISE) **2 days · Days 1-2**	SELF-PACED VIDEO **1-year LMS access**
BATCH SIZE **Max 10 learners**	NEXT BATCHES **1st of every month · weekends: first Saturday**	CERTIFICATE **Verifiable certificate of completion**

Foundation	Essential	Intermediate	Advanced
1 day · Included	2 days · This curriculum	3 days · Next step	5 days · Later

INSIDE THIS CURRICULUM

What you will achieve	Outcomes and level focus
Who should attend	Audience and prerequisites
Agenda	23 topics · Foundation to Essential
Hands-on labs	2 labs
Formats and fees	Live, 1:1, self-paced, corporate
Trainer and reviews	Rajesh Kumar
Enrolment	Batches, payment, contacts

WHY DEVOPSSCHOOL

- Rated 4.6 on Google
- 1,500+ verifiable certificates issued in the public registry
- Trainer Rajesh Kumar: 20 years in industry
- Small batches: max 10 learners, every session recorded

OUTCOMES

What you will achieve

By the end of the Predictive Analytics course path, you will be able to:

1

Build accurate predictive models

Prepare data and build, evaluate and tune regression, classification and forecasting models.

2

Explain and trust predictions

Interpret models with explainability tools and validate them against leakage and bias.

3

Turn predictions into value

Deploy, monitor and govern models and link them to measurable business decisions.

WHAT THE ESSENTIAL LEVEL ADDS

Data preparation, regression, classification and evaluation

Hands-on: Build a customer churn classifier. Clean and engineer features from customer data, compare logistic regression and decision trees with cross-validation, and choose a business-driven threshold.

WHO SHOULD ATTEND

- Learners who know the basics of Predictive Analytics and want to use it confidently every day.
- Professionals taking over Predictive Analytics work on a live project.
- Teams agreeing on a common way of working with Predictive Analytics.

BEFORE YOU START

- The Foundation level, or equivalent hands-on experience.
- You can already: Explain how predictive analytics creates business value, set up Python tools and build and evaluate a first regression model.
- Basic computer skills and a laptop with a stable internet connection for the live sessions and labs.
- This curriculum includes every earlier level, so it is complete on its own.

AGENDA · FOUNDATION TO ESSENTIAL

Predictive Analytics Essential Training agenda

23 topics. Each level builds on the one before it, so this curriculum lists every earlier level in full. Days are for corporate (day-wise) delivery; live online batches cover the same agenda in max 8-10 hours.

DAY 1 — Foundation: Analytics concepts, statistics, tools and first model

Included from Foundation

1. Analytics spectrum: descriptive, diagnostic, predictive and prescriptive analytics
2. Business use cases: churn prediction, demand forecasting, credit risk, fraud and predictive maintenance
3. CRISP-DM lifecycle: business understanding, data understanding, preparation, modelling, evaluation and deployment
4. Data fundamentals: structured and unstructured data, data sources, target variables and features
5. Statistics refresher: distributions, mean, variance, percentiles and correlation vs causation
6. Probability basics: conditional probability, Bayes' theorem and expected value
7. Tooling: Python with Jupyter, pandas, scikit-learn and Matplotlib; alternatives such as R and Excel
8. Environment setup: installing Python with Anaconda or uv, creating environments and launching notebooks
9. Loading and exploring data: reading CSV and Excel files, summary statistics and simple charts
10. First predictive model: simple and multiple linear regression with scikit-learn
11. Train and test split: why we hold out data and how to evaluate with MAE and RMSE
12. Ethics and data privacy: consent, sensitive attributes and responsible use of predictions

DAY 2 — Essential: Data preparation, regression, classification and evaluation

New at this level

13. Data cleaning: missing values, outliers, duplicates and inconsistent categories
14. Exploratory data analysis: distributions, relationships and visual storytelling with seaborn
15. Feature engineering: encoding categories, scaling, binning, date features and interaction terms
16. Regression in depth: polynomial terms and regularised Ridge, Lasso and Elastic Net models
17. Classification models: logistic regression, decision trees, k-nearest neighbours and naive Bayes
18. Classification metrics: confusion matrix, precision, recall, F1 score and ROC-AUC
19. Choosing thresholds: cost-sensitive decisions and precision-recall trade-offs
20. Cross-validation: k-fold and stratified validation for reliable estimates
21. Overfitting and underfitting: the bias-variance trade-off and learning curves
22. Hyperparameter tuning: GridSearchCV and RandomizedSearchCV
23. Communicating results: translating model metrics into business impact for stakeholders

PRACTICE

Hands-on labs

You build these yourself during the course, guided by the trainer.

FOUNDATION

Predict house prices with regression

Load a housing dataset, explore it with pandas and charts, fit a linear regression, and report its error on held-out test data.

ESSENTIAL

Build a customer churn classifier

Clean and engineer features from customer data, compare logistic regression and decision trees with cross-validation, and choose a business-driven threshold.

HOW YOU CAN LEARN

Formats and fees

The same agenda in four formats. Fees are in Indian rupees as of November 2026; the course page shows them in your currency.

FORMAT	DURATION	WHAT YOU GET	FEE
Live & interactive (online)	Max 8-10 hours	Instructor-led public batch of max 10 learners with demos, labs, Q&A and assignment review. Weekday batches start on the 1st of every month, weekend batches on the first Saturday of every month.	**INR 34,999**
1:1 live training (online)	Max 8-10 hours, one-to-one	The same agenda, taught one-to-one by the trainer. Starts immediately, without waiting for the next batch; sessions planned around your working hours, at your pace.	**INR 99,999**
Self-paced video	1-year LMS access	All four Predictive Analytics levels, plus 20+ more courses and 50+ tools, at your own pace.	**INR 833/month** billed yearly at INR 9,996
Corporate (day-wise)	2 days for this level	A private batch for your team, on demand. Foundation 1 day, Essential 2, Intermediate 3, Advanced 5 (cumulative).	**Quote on request**

ASSESSMENT AND CERTIFICATE

Your progress is checked through hands-on labs and assignments at every level. On completion you receive a DevOpsSchool certificate of completion with a unique credential ID that anyone can verify at devopsschool.com/certificates.

INCLUDED WITH EVERY LIVE BATCH

- Every live session is recorded and stays in your LMS for a year.
- Can't attend your batch? Move to next month's batch.
- Free demo class before you pay.
- Free 10-15 minute call with an advisor or the trainer to check the course fits you.

YOUR TRAINER

Learn from Rajesh Kumar

Principal Architect, trainer and mentor in DevOps, SRE, DevSecOps and platform engineering, with 20 years across 8+ software MNCs, including Staff DevOps/SRE Engineer for a leading Japanese mobile-payment platform and Principal DevOps Architect and Manager in Europe.

Profile: www.rajeshkumar.xyz · Videos: youtube.com/@TheDevOpsSchool

20 years in industry	**200+** corporate trainings
10,000+ engineers mentored	**70+** organisations coached

REVIEWS

What learners say

Rated 4.6 on Google · more reviews at devopsschool.com/testimonials and in our video testimonials.

> “Rajesh is very good trainer. Rajesh was able to resolve our queries and question effectively. We really liked the hands-on examples covered during this training program.”
>
> Indrayani, India

> “The training was very useful and interactive. Rajesh helped develop the confidence of all.”
>
> Abhinav Gupta, Pune

START YOUR PREDICTIVE ANALYTICS TRAINING

Join the next batch

Weekday batches start on the 1st of every month and weekend batches on the first Saturday of every month, with max 10 learners each. 1:1 training can start immediately; corporate batches run on demand. We reply within 1 hour.
