6. Addressing the repository: repository URLs with file://, http://, https://, svn:// and svn+ssh://
7. Subversion working copies: how the working copy works and the .svn administrative area
8. Fundamental working copy interactions: checkout, update and commit at a glance
9. Mixed-revision working copies: why they happen and their limitations
10. Installing Subversion: command-line client on Linux, Windows and macOS and TortoiseSVN
