OUTCOMES

What you will achieve

By the end of the Tekton course path, you will be able to:

1

Build Kubernetes-native pipelines

Write Tasks and Pipelines that build, test and package applications on Kubernetes.

2

Automate and secure delivery

Trigger pipelines from Git, sign artifacts with Chains and hand off to GitOps deployment.

3

Operate Tekton at scale

Run Tekton as a governed, observable, multi-team CI/CD platform.

WHAT THE FOUNDATION LEVEL ADDS

Kubernetes-native CI/CD concepts and first Task

Hands-on: First Tekton Task and Pipeline. Install Tekton Pipelines on a kind cluster, write a Task with params and results and chain two Tasks into a Pipeline run with tkn.

WHO SHOULD ATTEND

- Beginners and working professionals who are new to Tekton and want a solid, hands-on start.
- Engineers, analysts, testers and students preparing to use Tekton on real work.
- Leads and managers who want first-hand familiarity with Tekton.

BEFORE YOU START

- No prior Tekton experience is needed.
- Basic computer skills and a laptop with a stable internet connection for the live sessions and labs.
- This curriculum includes every earlier level, so it is complete on its own.

AGENDA · FOUNDATION

Tekton Foundation Training agenda

10 topics. Each level builds on the one before it, so this curriculum lists every earlier level in full. Days are for corporate (day-wise) delivery; live online batches cover the same agenda in max 8-10 hours.

DAY 1 — Foundation: Kubernetes-native CI/CD concepts and first Task

New at this level

1. Cloud-native CI/CD: why run pipelines as Kubernetes resources and where Tekton fits
2. Tekton projects: Pipelines, Triggers, Chains, Dashboard, Results and the CLI
3. Core concepts: Steps, Tasks, TaskRuns, Pipelines and PipelineRuns
4. How Tekton runs work: each TaskRun as a pod and each Step as a container
5. Installing Tekton Pipelines: release manifests or the Tekton Operator on a lab cluster
6. The tkn CLI: listing, starting and following logs of Tasks and Pipelines
7. First Task: a script step that runs inside a container image
8. Params and results: passing parameters into Tasks and emitting results
9. First Pipeline: ordering Tasks with runAfter and passing results between them
10. Tekton Dashboard: installing it and inspecting runs and logs

PRACTICE

Hands-on labs

You build these yourself during the course, guided by the trainer.

FOUNDATION

First Tekton Task and Pipeline
