DevOpsSchool

Course curriculum · November 2026

LEVEL 02 OF 04 · ESSENTIAL

Performance Testing Essential Training

Build realistic, data-driven load scripts in JMeter and k6 with correlation, assertions and workload models that match production.

LIVE ONLINE **Max 8-10 hours**	CORPORATE (DAY-WISE) **2 days · Days 1-2**	SELF-PACED VIDEO **1-year LMS access**
BATCH SIZE **Max 10 learners**	NEXT BATCHES **1st of every month · weekends: first Saturday**	CERTIFICATE **Verifiable certificate of completion**

Foundation	Essential	Intermediate	Advanced
1 day · Included	2 days · This curriculum	3 days · Next step	5 days · Later

INSIDE THIS CURRICULUM

What you will achieve	Outcomes and level focus
Who should attend	Audience and prerequisites
Agenda	24 topics · Foundation to Essential
Hands-on labs	2 labs
Formats and fees	Live, 1:1, self-paced, corporate
Trainer and reviews	Rajesh Kumar
Enrolment	Batches, payment, contacts

WHY DEVOPSSCHOOL

- Rated 4.6 on Google
- 1,500+ verifiable certificates issued in the public registry
- Trainer Rajesh Kumar: 20 years in industry
- Small batches: max 10 learners, every session recorded

OUTCOMES

What you will achieve

By the end of the Performance Testing course path, you will be able to:

1

Design realistic load tests

Model production workloads and script correlated, data-driven tests in JMeter and k6.

2

Diagnose performance bottlenecks

Correlate load results with metrics, traces and profiles to find and fix root causes.

3

Engineer performance continuously

Run performance gates in CI/CD and plan capacity for scalable, resilient systems.

WHAT THE ESSENTIAL LEVEL ADDS

Realistic scripts, correlation, parameterisation and assertions

Hands-on: Data-driven API load test in k6. Script an authenticated API journey in JMeter and in k6 with CSV test data, token correlation and thresholds, then compare baseline results.

WHO SHOULD ATTEND

- Learners who know the basics of Performance Testing and want to use it confidently every day.
- Professionals taking over Performance Testing work on a live project.
- Teams agreeing on a common way of working with Performance Testing.

BEFORE YOU START

- The Foundation level, or equivalent hands-on experience.
- You can already: Explain load, stress and soak testing, read key performance metrics and record and run a first JMeter test against a web app.
- Basic computer skills and a laptop with a stable internet connection for the live sessions and labs.
- This curriculum includes every earlier level, so it is complete on its own.

AGENDA · FOUNDATION TO ESSENTIAL

Performance Testing Essential Training agenda

24 topics. Each level builds on the one before it, so this curriculum lists every earlier level in full. Days are for corporate (day-wise) delivery; live online batches cover the same agenda in max 8-10 hours.

DAY 1 — Foundation: Performance concepts, test types and first JMeter script

Included from Foundation

1. Why performance testing: user experience, capacity, scalability and the cost of slow or failing releases
2. Test types: load, stress, spike, soak or endurance, volume, scalability and breakpoint tests
3. Core metrics: response time percentiles (p90, p95, p99), throughput, error rate, concurrency and Apdex
4. Little's Law and workload basics: arrival rate, think time, pacing and open versus closed workload models
5. Performance requirements: turning business goals into SLAs and SLOs with measurable thresholds
6. Test environment: production-like sizing, test data, isolation and monitoring the system under test
7. Tool landscape: Apache JMeter, Grafana k6, Gatling, Locust and cloud load services compared
8. Installing JMeter: Java requirements, GUI versus non-GUI mode, plugins manager and folder layout
9. JMeter building blocks: test plan, thread groups, HTTP requests, listeners, config elements, timers and pre or post processors
10. Recording a script: HTTP(S) Test Script Recorder, browser proxy setup and the JMeter root certificate
11. First run: running in non-GUI mode with jmeter -n -t -l and generating the HTML dashboard report
12. Reading results: aggregate report, response time over time, errors and spotting obvious bottlenecks

DAY 2 — Essential: Realistic scripts, correlation, parameterisation and assertions

New at this level

13. Parameterisation: CSV Data Set Config, user variables, random and counter functions for unique test data
14. Correlation: extracting session IDs, CSRF tokens and OAuth tokens with Regular Expression, JSON and Boundary extractors
15. Assertions: response, JSON, duration and size assertions without overloading the load generator
16. Logic controllers: transaction, if, loop, while, throughput and once-only controllers for user journeys
17. Timers and pacing: constant, uniform random and constant throughput timers, think time from real analytics
18. Workload modelling: transaction mix from production logs, concurrency targets and ramp-up profiles
19. API performance testing: REST and GraphQL requests, headers, authentication and payload variation
20. Grafana k6 basics: JavaScript test scripts, virtual users, scenarios and executors such as ramping-arrival-rate
21. k6 checks and thresholds: pass and fail criteria on p95 latency and error rate in code
22. Gatling and Locust overview: simulation DSL, feeders and Python user classes for teams that prefer code
23. Script debugging: View Results Tree, debug post processor, logging and validating one user before scaling up
24. Test execution checklist: smoke run, baseline run, environment readiness and stakeholder sign-off

PRACTICE

Hands-on labs

You build these yourself during the course, guided by the trainer.

FOUNDATION

Record and run a first load test

Record a login-and-browse journey with the JMeter recorder, run it for 20 virtual users in non-GUI mode and read the HTML dashboard.

ESSENTIAL

Data-driven API load test in k6

Script an authenticated API journey in JMeter and in k6 with CSV test data, token correlation and thresholds, then compare baseline results.

HOW YOU CAN LEARN

Formats and fees

The same agenda in four formats. Fees are in Indian rupees as of November 2026; the course page shows them in your currency.

FORMAT	DURATION	WHAT YOU GET	FEE
Live & interactive (online)	Max 8-10 hours	Instructor-led public batch of max 10 learners with demos, labs, Q&A and assignment review. Weekday batches start on the 1st of every month, weekend batches on the first Saturday of every month.	**INR 34,999**
1:1 live training (online)	Max 8-10 hours, one-to-one	The same agenda, taught one-to-one by the trainer. Starts immediately, without waiting for the next batch; sessions planned around your working hours, at your pace.	**INR 99,999**
Self-paced video	1-year LMS access	All four Performance Testing levels, plus 20+ more courses and 50+ tools, at your own pace.	**INR 833/month** billed yearly at INR 9,996
Corporate (day-wise)	2 days for this level	A private batch for your team, on demand. Foundation 1 day, Essential 2, Intermediate 3, Advanced 5 (cumulative).	**Quote on request**

ASSESSMENT AND CERTIFICATE

Your progress is checked through hands-on labs and assignments at every level. On completion you receive a DevOpsSchool certificate of completion with a unique credential ID that anyone can verify at devopsschool.com/certificates.

INCLUDED WITH EVERY LIVE BATCH

- Every live session is recorded and stays in your LMS for a year.
- Can't attend your batch? Move to next month's batch.
- Free demo class before you pay.
- Free 10-15 minute call with an advisor or the trainer to check the course fits you.

YOUR TRAINER

Learn from Rajesh Kumar

Principal Architect, trainer and mentor in DevOps, SRE, DevSecOps and platform engineering, with 20 years across 8+ software MNCs, including Staff DevOps/SRE Engineer for a leading Japanese mobile-payment platform and Principal DevOps Architect and Manager in Europe.

Profile: www.rajeshkumar.xyz · Videos: youtube.com/@TheDevOpsSchool

20 years in industry	**200+** corporate trainings
10,000+ engineers mentored	**70+** organisations coached

REVIEWS

What learners say

Rated 4.6 on Google · more reviews at devopsschool.com/testimonials and in our video testimonials.

> “Rajesh is very good trainer. Rajesh was able to resolve our queries and question effectively. We really liked the hands-on examples covered during this training program.”
>
> Indrayani, India

> “The training was very useful and interactive. Rajesh helped develop the confidence of all.”
>
> Abhinav Gupta, Pune

START YOUR PERFORMANCE TESTING TRAINING

Join the next batch

Weekday batches start on the 1st of every month and weekend batches on the first Saturday of every month, with max 10 learners each. 1:1 training can start immediately; corporate batches run on demand. We reply within 1 hour.

Pay by UPI, credit and debit cards, net banking or PayPal. Before you pay, read our refund policy. All levels of this course: www.devopsschool.com/courses/testing/
