DevOpsSchool

Course curriculum · November 2026

LEVEL 03 OF 04 · INTERMEDIATE

Udeploy Intermediate Training

Control promotions with approvals, gates and schedules, manage configuration and organise agents and resources for teams.

LIVE ONLINE **Max 8-10 hours**	CORPORATE (DAY-WISE) **3 days · Days 1-3**	SELF-PACED VIDEO **1-year LMS access**
BATCH SIZE **Max 10 learners**	NEXT BATCHES **1st of every month · weekends: first Saturday**	CERTIFICATE **Verifiable certificate of completion**

Foundation	Essential	Intermediate	Advanced
1 day · Included	2 days · Included	3 days · This curriculum	5 days · Next step

INSIDE THIS CURRICULUM

What you will achieve	Outcomes and level focus
Who should attend	Audience and prerequisites
Agenda	33 topics · Foundation to Intermediate
Hands-on labs	3 labs
Formats and fees	Live, 1:1, self-paced, corporate
Trainer and reviews	Rajesh Kumar
Enrolment	Batches, payment, contacts

WHY DEVOPSSCHOOL

- Rated 4.6 on Google
- 1,500+ verifiable certificates issued in the public registry
- Trainer Rajesh Kumar: 20 years in industry
- Small batches: max 10 learners, every session recorded

OUTCOMES

What you will achieve

By the end of the Udeploy course path, you will be able to:

1

Automate application deployments

Build components, processes and applications that deploy consistently to every environment.

2

Govern every release

Use snapshots, approvals, gates, schedules and notifications to control promotions.

3

Run uDeploy securely

Administer agents, resources, security, CLI automation and plug-ins for many teams.

WHAT THE INTERMEDIATE LEVEL ADDS

Approvals, gating, configuration and infrastructure

Hands-on: Gate production with approvals and schedules. Add an approval process and a status gate to production, schedule a deployment in a change window and route notifications to the release team.

WHO SHOULD ATTEND

- Regular Udeploy users who want to automate, integrate and manage it at a deeper level.
- Specialists who support Udeploy for colleagues or customers.
- Leads preparing Udeploy for wider use across projects.

BEFORE YOU START

- The Essential level, or equivalent hands-on experience.
- You can already: Build reusable component and application processes with properties, and release consistent versions using snapshots.
- Basic computer skills and a laptop with a stable internet connection for the live sessions and labs.
- This curriculum includes every earlier level, so it is complete on its own.

AGENDA · FOUNDATION TO INTERMEDIATE

Udeploy Intermediate Training agenda

33 topics. Each level builds on the one before it, so this curriculum lists every earlier level in full. Days are for corporate (day-wise) delivery; live online batches cover the same agenda in max 8-10 hours.

DAY 1 — Foundation: UDeploy overview, object model and setup

Included from Foundation

1. Overview: what uDeploy (IBM UrbanCode Deploy) automates and where it fits in a CI/CD toolchain
2. uDeploy object model: components, versions, applications, environments, resources and processes
3. Server and agents: server roles, agent communication, agent relays and supported platforms
4. Installation: server prerequisites, database choice, agent installation and first console login
5. Components: creating a component and choosing a source for its versions
6. Inventory: what inventory records and how it shows what is deployed where
7. Component processes 1: designing a first process with download, configure and start steps
8. Resources and agents basics: mapping a component to an agent in the resource tree
9. First deployment: running a component process against a test environment
10. Reading results: process status, step output and basic troubleshooting

DAY 2 — Essential: Processes, properties, applications and snapshots

Included from Essential

11. Properties: property scopes, the p: lookup syntax and secure properties
12. Reusable component definitions: shared process and property definitions across similar components
13. Component processes 2: conditional switch steps, manual tasks, rollback and failure handling
14. Applications: grouping components into an application and setting environment order
15. Application process: install, uninstall and rollback flows across components
16. Snapshot: capturing a tested set of versions and configuration as a release unit
17. Creating a snapshot: from an environment or by selecting versions and locking them
18. Full deployments and incremental deployments: behaviour, use cases and risks of each
19. How to execute deployments: request options, only-changed versions and deployment parameters
20. Comparing environments: spotting version and configuration differences before release
21. Snapshot preview: checking what a snapshot deployment will change

DAY 3 — Intermediate: Approvals, gating, configuration and infrastructure

New at this level

22. Approvals: creating approvals for environments and designing approval processes
23. Gating: environment gates based on version status and promotion rules
24. How to schedule the deployment: calendar, scheduled requests and blackout dates
25. Application configuration management: managing configuration files and configuration blueprints
26. Notifications: notification schemes for approvals, failures and successful deployments
27. Agents: agent properties, upgrades, health and agent relays
28. Resources and resource groups: structuring the resource tree by environment and tier
29. Agent pools: sharing agents across environments and scaling deployments
30. Resource roles: assigning roles to resources for targeted steps

31. Environment configuration: environment properties, base resources and cleanup policies
32. Process request: request lifecycle, queuing and execution logs
33. Process types and default working directory: operational, deployment and configuration processes and agent work paths

PRACTICE

Hands-on labs

You build these yourself during the course, guided by the trainer.

FOUNDATION

Deploy a first component with uDeploy

Install a uDeploy server and agent, create a component with a version from the file system and deploy it to a test resource with a simple process.

ESSENTIAL

Release an application with snapshots

Create a three-component application with an install and rollback process, build a snapshot from test and preview and deploy it to staging.

INTERMEDIATE

Gate production with approvals and schedules

Add an approval process and a status gate to production, schedule a deployment in a change window and route notifications to the release team.

HOW YOU CAN LEARN

Formats and fees

The same agenda in four formats. Fees are in Indian rupees as of November 2026; the course page shows them in your currency.

FORMAT	DURATION	WHAT YOU GET	FEE
Live & interactive (online)	Max 8-10 hours	Instructor-led public batch of max 10 learners with demos, labs, Q&A and assignment review. Weekday batches start on the 1st of every month, weekend batches on the first Saturday of every month.	**INR 34,999**
1:1 live training (online)	Max 8-10 hours, one-to-one	The same agenda, taught one-to-one by the trainer. Starts immediately, without waiting for the next batch; sessions planned around your working hours, at your pace.	**INR 99,999**
Self-paced video	1-year LMS access	All four Udeploy levels, plus 20+ more courses and 50+ tools, at your own pace.	**INR 833/month** billed yearly at INR 9,996
Corporate (day-wise)	3 days for this level	A private batch for your team, on demand. Foundation 1 day, Essential 2, Intermediate 3, Advanced 5 (cumulative).	**Quote on request**

ASSESSMENT AND CERTIFICATE

Your progress is checked through hands-on labs and assignments at every level. On completion you receive a DevOpsSchool certificate of completion with a unique credential ID that anyone can verify at devopsschool.com/certificates.

INCLUDED WITH EVERY LIVE BATCH

- Every live session is recorded and stays in your LMS for a year.
- Can't attend your batch? Move to next month's batch.
- Free demo class before you pay.
- Free 10-15 minute call with an advisor or the trainer to check the course fits you.

YOUR TRAINER

Learn from Rajesh Kumar

Principal Architect, trainer and mentor in DevOps, SRE, DevSecOps and platform engineering, with 20 years across 8+ software MNCs, including Staff DevOps/SRE Engineer for a leading Japanese mobile-payment platform and Principal DevOps Architect and Manager in Europe.

Profile: www.rajeshkumar.xyz · Videos: youtube.com/@TheDevOpsSchool

20 years in industry	**200+** corporate trainings
10,000+ engineers mentored	**70+** organisations coached

REVIEWS

What learners say

Rated 4.6 on Google · more reviews at devopsschool.com/testimonials and in our video testimonials.

> “Rajesh is very good trainer. Rajesh was able to resolve our queries and question effectively. We really liked the hands-on examples covered during this training program.”
>
> Indrayani, India

> “The training was very useful and interactive. Rajesh helped develop the confidence of all.”
>
> Abhinav Gupta, Pune

START YOUR UDEPLOY TRAINING

Join the next batch

Weekday batches start on the 1st of every month and weekend batches on the first Saturday of every month, with max 10 learners each. 1:1 training can start immediately; corporate batches run on demand. We reply within 1 hour.
