DevOpsSchool

Course curriculum · November 2026

LEVEL 03 OF 04 · INTERMEDIATE

Velero Intermediate Training

Move snapshot data off-cluster, migrate workloads between clusters, monitor backups and secure your Velero deployment.

LIVE ONLINE **Max 8-10 hours**	CORPORATE (DAY-WISE) **3 days · Days 1-3**	SELF-PACED VIDEO **1-year LMS access**
BATCH SIZE **Max 10 learners**	NEXT BATCHES **1st of every month · weekends: first Saturday**	CERTIFICATE **Verifiable certificate of completion**

Foundation	Essential	Intermediate	Advanced
1 day · Included	2 days · Included	3 days · This curriculum	5 days · Next step

INSIDE THIS CURRICULUM

What you will achieve	Outcomes and level focus
Who should attend	Audience and prerequisites
Agenda	34 topics · Foundation to Intermediate
Hands-on labs	3 labs
Formats and fees	Live, 1:1, self-paced, corporate
Trainer and reviews	Rajesh Kumar
Enrolment	Batches, payment, contacts

WHY DEVOPSSCHOOL

- Rated 4.6 on Google
- 1,500+ verifiable certificates issued in the public registry
- Trainer Rajesh Kumar: 20 years in industry
- Small batches: max 10 learners, every session recorded

OUTCOMES

What you will achieve

By the end of the Velero course path, you will be able to:

1

Back up Kubernetes reliably

Back up and restore cluster resources and persistent volumes with Velero, CSI snapshots and Kopia.

2

Migrate and recover workloads

Move applications between clusters and clouds and restore them consistently with hooks and modifiers.

3

Run disaster recovery

Design, monitor, secure and regularly test a multi-cluster backup and recovery strategy.

WHAT THE INTERMEDIATE LEVEL ADDS

Data movement, migration, monitoring and security

Hands-on: Migrate an application between clusters. Back up an application with Data Mover in one cluster and restore it into a second cluster with a different storage class using resource modifiers.

WHO SHOULD ATTEND

- Regular Velero users who want to automate, integrate and manage it at a deeper level.
- Specialists who support Velero for colleagues or customers.
- Leads preparing Velero for wider use across projects.

BEFORE YOU START

- The Essential level, or equivalent hands-on experience.
- You can already: Protect stateful applications with CSI snapshots and file system backups, scheduled policies, filters and consistency hooks.
- Basic computer skills and a laptop with a stable internet connection for the live sessions and labs.
- This curriculum includes every earlier level, so it is complete on its own.

AGENDA · FOUNDATION TO INTERMEDIATE

Velero Intermediate Training agenda

34 topics. Each level builds on the one before it, so this curriculum lists every earlier level in full. Days are for corporate (day-wise) delivery; live online batches cover the same agenda in max 8-10 hours.

DAY 1 — Foundation: Kubernetes backup concepts, architecture and installation

Included from Foundation

1. Why Kubernetes backup: etcd snapshots versus application-aware backup, recovery point and recovery time objectives
2. What Velero does: backing up, restoring and migrating cluster resources and persistent volumes
3. Architecture: Velero server, custom resources, node agent DaemonSet and object storage
4. Core resources: Backup, Restore, Schedule, BackupStorageLocation and VolumeSnapshotLocation
5. Storage providers: plugins for AWS S3, Azure Blob, Google Cloud Storage and S3-compatible MinIO
6. Installing the CLI: velero client install, version checks and shell completion
7. Installing the server: velero install flags and the official Helm chart
8. Credentials: cloud credentials files, IAM roles and Kubernetes secrets for plugins
9. First backup: velero backup create for one namespace and describing the result
10. First restore: velero restore create from a backup and verifying the workload
11. Backup contents: how resources are stored in object storage and backup logs

DAY 2 — Essential: Volume backups, schedules, filtering and hooks

Included from Essential

12. Volume backup options: CSI snapshots, cloud provider snapshots and file system backup
13. CSI snapshots: VolumeSnapshotClass setup and Velero's built-in CSI snapshot support
14. File System Backup: the node agent, the Kopia uploader and opt-in or opt-out volume selection
15. Schedules: cron-based schedules, backup TTL and retention
16. Resource filtering: include and exclude namespaces, resources, label selectors and cluster-scoped resources
17. Backup hooks: pre and post exec hooks to quiesce databases for consistent backups
18. Restore options: namespace mapping, restoring selected resources and existing resource policies
19. Restore hooks: init containers and exec hooks to prepare data after restore
20. Status and troubleshooting: velero backup describe and logs, partially failed backups and common errors
21. Multiple locations: several BackupStorageLocations and choosing defaults per backup
22. Day-to-day CLI: get, describe, delete and download operations for backups and restores

DAY 3 — Intermediate: Data movement, migration, monitoring and security

New at this level

23. CSI snapshot data movement: Data Mover for copying snapshot data to object storage
24. Cluster migration: moving workloads between clusters, Kubernetes versions and cloud providers
25. Resource modifiers: changing storage classes, images or fields during restore
26. Restore ordering and dependencies: CRDs, custom resources and restore resource priorities
27. Backup repositories: Kopia repository maintenance, encryption and storage costs
28. Monitoring: Velero Prometheus metrics, alerts on failed or missing backups and dashboards
29. Security: RBAC for Velero, restricting who can restore, credential rotation and object storage encryption
30. Immutable backups: object lock and bucket policies to defend against ransomware and deletion

31. Upgrades: upgrading Velero, CRDs and plugins safely
32. Plugins: backup and restore item actions and extending Velero with custom plugins
33. GitOps and automation: managing schedules and storage locations declaratively with Argo CD or Flux
34. Troubleshooting: debug bundles, node agent issues, snapshot timeouts and partially failed restores

PRACTICE

Hands-on labs

You build these yourself during the course, guided by the trainer.

FOUNDATION

Back up and restore a namespace

Install Velero with MinIO as object storage, back up a namespace running a web application, delete it as if by mistake and restore it to working order.

ESSENTIAL

Protect a stateful database with hooks

Schedule daily backups of a PostgreSQL StatefulSet with CSI snapshots and pre-backup hooks, then restore it into a new namespace with namespace mapping.

INTERMEDIATE

Migrate an application between clusters

Back up an application with Data Mover in one cluster and restore it into a second cluster with a different storage class using resource modifiers.

HOW YOU CAN LEARN

Formats and fees

The same agenda in four formats. Fees are in Indian rupees as of November 2026; the course page shows them in your currency.

FORMAT	DURATION	WHAT YOU GET	FEE
Live & interactive (online)	Max 8-10 hours	Instructor-led public batch of max 10 learners with demos, labs, Q&A and assignment review. Weekday batches start on the 1st of every month, weekend batches on the first Saturday of every month.	**INR 34,999**
1:1 live training (online)	Max 8-10 hours, one-to-one	The same agenda, taught one-to-one by the trainer. Starts immediately, without waiting for the next batch; sessions planned around your working hours, at your pace.	**INR 99,999**
Self-paced video	1-year LMS access	All four Velero levels, plus 20+ more courses and 50+ tools, at your own pace.	**INR 833/month** billed yearly at INR 9,996
Corporate (day-wise)	3 days for this level	A private batch for your team, on demand. Foundation 1 day, Essential 2, Intermediate 3, Advanced 5 (cumulative).	**Quote on request**

ASSESSMENT AND CERTIFICATE

Your progress is checked through hands-on labs and assignments at every level. On completion you receive a DevOpsSchool certificate of completion with a unique credential ID that anyone can verify at devopsschool.com/certificates.

INCLUDED WITH EVERY LIVE BATCH

- Every live session is recorded and stays in your LMS for a year.
- Can't attend your batch? Move to next month's batch.
- Free demo class before you pay.
- Free 10-15 minute call with an advisor or the trainer to check the course fits you.

YOUR TRAINER

Learn from Rajesh Kumar

Principal Architect, trainer and mentor in DevOps, SRE, DevSecOps and platform engineering, with 20 years across 8+ software MNCs, including Staff DevOps/SRE Engineer for a leading Japanese mobile-payment platform and Principal DevOps Architect and Manager in Europe.

Profile: www.rajeshkumar.xyz · Videos: youtube.com/@TheDevOpsSchool

20 years in industry	**200+** corporate trainings
10,000+ engineers mentored	**70+** organisations coached

REVIEWS

What learners say

Rated 4.6 on Google · more reviews at devopsschool.com/testimonials and in our video testimonials.

> “Rajesh is very good trainer. Rajesh was able to resolve our queries and question effectively. We really liked the hands-on examples covered during this training program.”
>
> Indrayani, India

> “The training was very useful and interactive. Rajesh helped develop the confidence of all.”
>
> Abhinav Gupta, Pune

START YOUR VELERO TRAINING

Join the next batch

Weekday batches start on the 1st of every month and weekend batches on the first Saturday of every month, with max 10 learners each. 1:1 training can start immediately; corporate batches run on demand. We reply within 1 hour.
